Design of Intelligent Applications using Machine Learning and Deep Learning Techniques Ramchandra Sharad Mangrulkar, Antonis Michalas, Narendra Shekokar, Meera Narvekar, Pallavi Vijay Chavan, 2021-08-15 Machine learning ML and deep learning DL algorithms are invaluable resources for Industry 4.0 and allied areas and are considered as the future of computing. A subfield called neural networks to recognize and understand patterns in data helps a machine carry out tasks in a manner similar to humans. The intelligent models developed using ML and DL are effectively designed and are fully investigated bringing in practical applications in many fields such as health care, agriculture and security. These algorithms can only be successfully applied in the context of data computing and analysis. Today ML and DL have created conditions for potential developments in detection and prediction. Apart from these domains ML and DL are found useful in analysing the social behaviour of humans. With the advancements in the amount and type of data available for use it became necessary to build a means to process the data and that is where deep neural networks prove their importance. These networks are capable of handling a large amount of data in such fields as finance and images. This book also exploits key applications in Industry 4.0 including Fundamental models, issues and challenges in ML and DL. Comprehensive analyses and probabilistic approaches for ML and DL. Various applications in healthcare predictions such as mental health, cancer, thyroid disease, lifestyle disease and cardiac arrhythmia. Industry 4.0 applications such as facial recognition, feather classification, water stress prediction, deforestation control, tourism and social networking. Security aspects of Industry 4.0 applications suggest remedial actions against possible attacks and prediction of associated risks. Information is presented in an accessible way for students, researchers and scientists, business innovators and entrepreneurs, sustainable assessment and management professionals. This book equips readers with a knowledge of data analytics, ML and DL techniques for applications defined under the umbrella of Industry 4.0. This book offers comprehensive coverage, promising ideas and outstanding research contributions supporting further development of ML and DL approaches by applying intelligence in various applications. Blood Cells Barbara J. Bain, Mike Leach, 2025-07-18 A comprehensive guide to blood cell morphology and interpretation, fully updated throughout. Understanding blood cell morphology and interpreting blood counts accurately is essential for both haematologists and biomedical scientists. This meticulously updated and comprehensive seventh edition of Blood Cells: A Practical Guide combines expert guidance with high quality imaging. This edition introduces new clinical images to enhance the contextual understanding of haematological findings alongside the latest WHO and International Consensus classifications of haematological neoplasms. Blood Cells: A Practical Guide bridges the gap between laboratory science and clinical application, covering essential techniques such as specimen collection, blood film preparation and staining. The authors also discuss the principles of manual and automated blood counts as well as abnormalities in blood counts and films within a clinical context. With up to date advice on additional tests to aid diagnosis, this new edition reinforces the importance

of microscopy whilst addressing the evolving demands of laboratory and clinical haematology Designed as both a reference for practising haematologists and a bench manual for trainees Blood Cells A Practical Guide Features new high quality clinical and morphological images to enhance blood cell identification and interpretation Highlights potential pitfalls and spurious results in haematological analysis to improve diagnostic accuracy Offers a self assessment component with multiple choice questions MCQs and extended matching questions EMQs available online Is written by leading experts with decades of experience in diagnostic haematology and blood cell morphology Blood Cells A Practical Guide remains an indispensable resource for those dedicated to the study and practice of haematology such as haematologists clinical scientists and biomedical scientists at all levels It also serves as a valuable reference for diagnostic haematology courses and laboratory training programmes in medical and biomedical science degrees
