Decolonising Journalism Education in South Africa Ylva Rodny-Gumede, Colin Chasi, Zubeida Jaffer, Mvuso Ponono, 2023-05-19 This book is the culmination of several years of collaborative work It is a unique contribution to the field of journalism because of the depth and variety of contributions it makes to the field The scholars who contribute to this volume respond to the great need to rethink journalism from various perspectives including journalism training research the contents of the news media language media ethics the safety of journalists and gender inequities in the news media In doing this they recognise how the societies that journalism address should themselves change Educational Leadership in Becoming Nuraan Davids, Yusef Waghid, 2016-08-25 Educational Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy curriculum inquiry and pedagogical action The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities The primary objective of the book is to draw on the Agambian notion of becoming in order to

show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society It should also appeal to those interested in the philosophy of education Campus Student Activism, Politics, and Citizenship in the 21st Century Tshishonga, Ndwakhulu, 2025-04-03 Student activism and citizenship remain an integral part of the governance of academic institutions democratizing the learning environment and advancing democratic values and societal change As a result student activism has become a key aspect of the global higher education landscape Individually and through the student councils students have been at the forefront fighting for social justice and equality inside their academic institutions and in larger society by fusing activism with citizenship Through student activism and citizenship students demonstrate their power to keep governments responsible and in redirecting the voices of students in higher education s decision making processes Further exploration may afford students the opportunity to influence social change by partaking in educational policy reforms and broadening global sociopolitical and economic growth Campus Student Activism Politics and Citizenship in the 21st Century examines the dynamics of campus politics through student activism and citizenship perspectives academia public private and civil society sectors It explores how student leadership engages university society stakeholders including management and governance structures and student welfare and institutional policy reformation in defense of the rights and interests of students This book covers topics such as higher education political engagement and social justice and is a useful resource for policymakers government officials sociologists political scientists academicians and researchers Maximizing Nitrogen Fixation in Legumes as a Tool for Sustainable Agriculture Intensification Pilar Irisarri, Juan Imperial, Fernando Alfredo Lattanzi, Jorge Monza, Jose Palacios, Juan Sanjuan, Julie Grossman, 2022-01-17 Decolonisation after Democracy Laurence Piper, 2020-05-21 Decolonisation after Democracy addresses the provocative idea that we need to rid higher education of lingering forms of colonial knowledge This matters because in the colonial era much knowledge was put to the service of subjugating indigenous peoples and the assumptions from this era may linger into the present Examples of deep rooted and foundational forms of knowledge that carry colonial traits are normative binaries such as civilised and backward modern and traditional and rational and superstitious In addition some accounts of positive values like freedom equality justice and democracy may hide the assumption that the western experience is the norm from which other kinds are rendered imitations deviations or pathologies In this collection some of South Africa's leading political scientists and academics engage with the challenge of decolonising knowledge in the research and teaching of politics It includes new insights about the state international relations clientelism statesociety relations and land reform and introduces new ways to engage the colonial library curriculum reform and the marginality of historically black institutions Finally the contributors deal with the

decolonial challenge posed by the FeesMustFall student movements reflecting on issues of revolutionary politics and gender and sexual violence This book was originally published as a special issue of Politikon *Implementing Sustainable Change* in Higher Education Brent D. Ruben, 2023-07-03 This book offers formal and informal leaders at all levels of their institution theory informed and practical guidance on implementing and sustaining change through collaborative leadership The framework and concepts presented are applicable at the department program campus or system level to guide minor incremental or transformative change Achieving a shared organizational vision can be a daunting challenge given the multiple missions of higher education varied and often conflicting stakeholder viewpoints siloed organizational structures traditions of shared governance and a highly educated workforce bringing together colleagues with diverse disciplinary perspectives Achieving these aims requires taking into account the organization s systems and values and the needs and aspirations of corresponding stakeholders across the enterprise Ruben provides a guide for achieving and sustaining these goals in an engaged and collaborative manner Employing the author's widely used Excellence in Higher Education EHE framework this book offers principles and practices relative to change collaboration and organizational vision that can greatly enhance the prospects for effective outcomes highlighting three key themes Understanding and leveraging the dynamics of change Leading collaboratively and meaningfully engaging one's colleagues Adopting and pursuing a shared vision of organizational purpose and aspirations The book is intended for faculty and staff who want to advance the effectiveness and impact of their program department and institution and to do so in a way that creates a shared vision to sustain these benefits into the future It serves as a text for the growing number of leadership development programs and for courses with a focus on higher education leadership Citizenship Utopias in the Global South Henri Onodera, Martta Kaskinen, Eija Ranta, 2025-01-23 Citizenship Utopias in the Global South is an edited collection of empirical research that explores emergent forms of activism in Africa Asia and Latin America in times of multiple crises At the intersection of hope and disillusionment the diverse and thought provoking chapters investigate emerging forms of activism in the Global South including youth activisms anti racism struggles feminist initiatives online dissent and Indigenous movements In the 2020s many parts of the world are witnessing contradictory processes of popular claims to rights livelihoods and social justice and subsequent forms of populist authoritarianism and the securitization of civil society Previously hopeful calls for dignity democracy and social justice through protesting strikes civil society campaigns legal reforms and elections for example have been met with disdain and civic disengagement This book investigates the re imagination and pursuit of citizen activism in such times of popular disillusionment It explores citizenship utopias as social imaginaries that are enacted and that articulate an ideal social order or democratic polity with ideal forms of experiencing citizenship Its chapters interrogate conventional approaches to citizenship by introducing a nuanced and empirically grounded exploration of the complex ways in which people experience negotiate and engage in the societal changes that they aspire towards The examination of citizenship

utopias outlines contemporary signals for transformative futures and their possibilities. The book undertakes a fresh effort at contributing to the shifting terrain of critical development studies political anthropology political sociology and decolonising scholarship by engaging in discussions about citizenship activism disillusionment and future societal alternatives in times of multiple global challenges.
