Comments will be made publicly available unless confidentiality is requested. The Proposed Amendments will only become effective following public notice and comment and approval by the OSC.

Background

TSX is considering the Proposed Amendments as described below in order to reduce the burden faced by issuers and their agents when raising capital via a prospectus offering by providing clarity, predictability and greater transparency of TSX policies.

Section 606 of the Manual sets out certain rules applicable to issuers that are proposing to distribute securities by way of a prospectus offering ("**prospectus offering**" or "**public offering**"). TSX currently requires its listed issuers to provide notice (the "**Notice**") to TSX of the proposed transaction. Upon review of the Notice, and pursuant to the policies set out under Section 606 of the Manual, TSX will determine if the offering is a "bona fide" public offering. Generally, if TSX determines that the offering is, in fact, bona fide, the terms of the offering are accepted by TSX, subject to the applicable provisions of Section 606 of the Manual. Where TSX determines that the offering is not a bona fide public offering, TSX will advise the issuer that the offering will be reviewed under Section 607 - Private Placements of the Manual (the "**Private Placement Rules**"), resulting in the application of additional rules on the transaction (e.g. discount and dilution restrictions).

Subsection 606(b) of the Manual states that in determining whether a prospectus offering is, in fact, a bona fide public offering, TSX will consider the following factors: (i) method of distribution; (ii) participation of insiders; (iii) number of placees; (iv) offering price; and (v) economic dilution. Subsection 606(b) does not, however, include details of how each factor, and the relative importance of how each factor, plays into the ultimate determination by TSX of whether a public offering is truly bona fide.

As stated above, Subsection 606(b) currently lists "offering price" as a factor that may indicate that a prospectus offering is not a bona fide public offering, without stating the acceptable level of discount. The absence of a stated discount was previously not generally problematic, as both stakeholders and TSX understood that up to a 10% discount to the five day volume weighted average trading price ("**Market Price**") of such securities on TSX was customary on a bona fide public offering. In addition, historically, bona fide public offerings have been marketed for a period of time that allowed for price discovery.

The Canadian senior market has since evolved, such that the vast majority of prospectus offerings are no longer "marketed" but instead are executed by way of a "bought deal" offer by a Canadian investment dealer. In some instances, prospectus offerings are executed by way of an overnight marketed deal. Both of these methods require execution of the offering, including the determination of pricing, within a very short timeframe. TSX has also noted that, in a growing number of cases, the securities are

Canadian Securities Law, The Ontario Securities Act and Alberta Securities Act, "The Top 111 Cases": A Primer Lyndon Maither, *Mergent Industrial Manual*, 2003 *Corporate Governance in Global Capital Markets* Janis Sarra, 2011-11-01. The recent failures of Enron, WorldCom, and other large publicly traded corporations have catapulted the issue of corporate governance onto the international stage. In this timely book, Janis Sarra draws together the work of legal scholars and practitioners from across North America to provide a comprehensive analysis of corporate governance issues in global capital markets. The contributors to this collection explore the theoretical underpinnings of corporate governance and provide concrete illustration of different models and their outcomes. While the perspectives of the authors sometimes differ, their common project is to explore different normative conceptions of the corporation in order to contribute to an analysis of global trends in corporate governance. The book measures diverse theoretical perspectives against the reality of corporate operations in current capital markets, exploring the norms that inform shifts in governance practice and the influence of regulatory regimes on governance change. Relationships both within and outside the firm are explored, including issues of accountability, ethics in decision making, and notions of efficiency in generation of corporate wealth. Legal scholars and practitioners with an interest in corporations, insolvency, and securities, as well as corporate directors, will welcome this addition to their libraries.

Venture Capital Douglas Cumming, 2010-04-29. An essential guide to venture capital. Studies have shown that venture capital-backed entrepreneurial firms are, on average, significantly more successful than non-venture capital-backed entrepreneurial firms in terms of innovativeness, profitability, and share price performance upon going public. Understanding the various aspects of venture capital is something anyone in any industry should be familiar with. This reliable resource provides a comprehensive view of venture capital by describing the current state of research and best practices in this arena. Issues addressed include sources of capital such as angel investment, corporate funds, and government funds; financial contracts and monitoring; and the efficiency implications of VC investment, to name a few.
