

Lesson Outline

Lesson 1: Earth's Atmosphere

A. Importance of Earth's Atmosphere

1. The atmosphere is a thin layer of gases surrounding Earth. It is hundreds of kilometers high.
2. Earth's atmosphere contains a layer of insulation that helps keep temperatures on Earth within a range that living organisms can survive.
3. Earth's atmosphere helps protect living organisms from some of the Sun's harmful rays.
4. Friction within the atmosphere causes most meteors to burn up before striking Earth.

B. Origins of Earth's Atmosphere

1. Earth's ancient atmosphere formed from hot gases that escaped from Earth's hardening surface.
2. Earth's ancient atmosphere consisted of water vapor with a little bit of carbon dioxide.
3. Water vapor is water in its gaseous state.
4. As Earth's atmosphere cooled, the water vapor condensed into a(n) liquid that fell as rain. Over thousands of years, the rain formed Earth's oceans.
5. Carbon dioxide from the atmosphere dissolved in rainwater and fell into the oceans.
6. Organisms that use photosynthesis produced the oxygen in today's atmosphere.

C. Composition of the Atmosphere

1. Nitrogen makes up about 78 percent of Earth's atmosphere.
2. Oxygen makes up about 21 percent of Earth's atmosphere.
3. The amounts of atmospheric gases, which include water vapor, carbon dioxide, and ozone vary.
4. Volcanoes send solid particles and liquid acids into the atmosphere.

D. Layers of the Atmosphere

1. The atmospheric layer closest to Earth is the troposphere.
2. The warmest part of the troposphere is near Earth's surface.
3. The stratosphere is the atmospheric layer directly above the troposphere.
4. The area of the stratosphere that has a great amount of ozone gas is the ozone layer.
5. Ultraviolet rays, which can kill plants and animals, are absorbed more effectively by ozone than by oxygen gas.

Concepts of Mathematics & Physics Parent Lesson Plan ,2013-08-01 Concepts of Mathematics and Physics Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Mathematics Numbers surround us Just try to make it through a day without using any It s impossible telephone numbers calendars volume settings shoe sizes speed limits weights street numbers microwave timers TV channels and the list goes on and on The many advancements and branches of mathematics were developed through the centuries as people encountered problems and relied upon math to solve them It s amazing how ten simple digits can be used in an endless number of ways to benefit man The development of these ten digits and their many uses is the fascinating story in Exploring the World of Mathematics Semester 2 Physics Physics is a branch of science that many people consider to be too complicated to understand John Hudson Tiner puts this myth to rest as he explains the fascinating world of physics in a way that students can comprehend Did you know that a feather and a lump of lead will fall at the same rate in a vacuum Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space Learn about the effects of inertia firsthand during fun and informative experiments Exploring the World of Physics is a great tool for students who want to have a deeper understanding of the important and interesting ways that physics affects our lives

Survey of Science History & Concepts Parent Lesson Plan ,2013-08-01 Survey of Science History Concepts Course Description Students will study four areas of science Scientific Mathematics Physics Biology and Chemistry Students will gain an appreciation for how each subject has affected our lives and for the people God revealed wisdom to as they sought to understand Creation Each content area is thoroughly explored giving students a good foundation in each discipline Semester 1 Math and Physics Numbers surround us Just try to make it through a day without using any It s impossible telephone numbers calendars volume settings shoe sizes speed limits weights street numbers microwave timers TV channels and the list goes on and on The many advancements and branches of mathematics were developed through the centuries as people encountered problems and relied upon math to solve them It s amazing how ten simple digits can be used in an endless number of ways to benefit man The development of these ten digits and their many uses is the fascinating story in Exploring the World of Mathematics Physics is a branch of science that many people consider to be too complicated to understand John Hudson Tiner puts this myth to rest as he explains the fascinating

world of physics in a way that students can comprehend Did you know that a feather and a lump of lead will fall at the same rate in a vacuum Learn about the history of physics from Aristotle to Galileo to Isaac Newton to the latest advances Discover how the laws of motion and gravity affect everything from the normal activities of everyday life to launching rockets into space Learn about the effects of inertia first hand during fun and informative experiments Exploring the World of Physics is a great tool for student who want to have a deeper understanding of the important and interesting ways that physics affects our lives

Semester 2 Biology and Chemistry The field of biology focuses on living things from the smallest microscopic protozoa to the largest mammal In this book you will read and explore the life of plants insects spiders and other arachnids life in water reptiles birds and mammals highlighting God s amazing creation You will learn about biological classification how seeds spread around the world long term storage of energy how biologists learned how the stomach digested food the plant that gave George de Mestral the idea of Velcro and so much more For most of history biologists used the visible appearance of plants or animals to classify them They grouped plants or animals with similar looking features into families Starting in the 1990 s biologists have extracted DNA and RNA from cells as a guide to how plants or animals should be grouped Like visual structures these reveal the underlying design of creation Exploring the World of Biology is a fascinating look at life from the smallest proteins and spores to the complex life systems of humans and animals

Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought Without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no televisions no microwave ovens or something as simple as wax paper This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers Find out why pure gold is not used for jewelry or coins Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life See how people in the 1870s could jump over the top of the Washington Monument Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information
