university rankings many governments adopt public incentives and sanctions to push universities to excel Above all the better faculty research publication in SSCI and SCI journals the more resources and social prestige universities will obtain This timely book attempts to relate these dilemmas in Taiwan to many non English speaking counterparts which also struggle with the worldwide SSCI syndrome As Taiwan s higher education system similar to that of some other countries has been

recently devastated by the SSCI based quantitative evaluations of academic performance in terms of its adverse impacts on the balances between teaching vs research qualitative vs quantitative evaluations globally oriented English vs locally oriented non English publications and publications in academic journals vs books The SSCI Syndrome in Higher Education is a long overdue study that offers a systematic comprehensive coverage of the above mentioned SSCI syndrome on the dynamics of Taiwan s academe This book definitely helps fill an important gap in the literature on Taiwan s higher education system Tsung Chi Professor of Politics Occidental College USA Prudence Chou s book addresses an academy on crisis caused by the ceaseless hype over university rankings It further confirms that who comes out on top depends on who is doing the ranking To save the heart and soul out of the Taiwanese academy this book makes a cogent argument for culturally responsive research in the social sciences and humanities Gerard A Postiglione Professor and Head Division of Policy Administration and Social Sciences Director Wah Ching Center of Research on Education in China The University of Hong Kong A spectre is haunting almost all universities in the world including Taiwan the spectre of indexization Academics particularly social scientists are panting from the pressure of globally spread neoliberal ideology and market based principles Collegiality on campus in the good old days has declined and managerialism gained power instead Competitive funding and university rankings are excessively emphasized and research results are required to be internationalized i e published in English Although this book is a case study of so called SSCI syndrome in Taiwan the problems and challenges as well as prescription contained here are common to all academics especially those in the non English speaking countries positioned as peripheral Yutaka Otsuka Professor of Hiroshima University President of Japan Comparative Education Society The danger with SSCI syndrome is that it encourages social studies in nonwestern societies to dissociate themselves from local contexts reflecting a particular view of what is claimed to be universal that is informed only by the Western especially English speaking world It raises the question of what counts as scholarship and defines what knowledge is and who may claim competence in it This volume serves us well as a timely reminder of such a great danger Rui Yang Professor Faculty of Education University of Hong Kong
