Barrett, Jon Bartley Stewart, 2010 Exploring Kierkegaard's complex use of the Bible the essays in this volume use source critical research and tools ranging from literary criticism to theology and biblical studies to situate Kierkegaard's appropriation of the biblical material in his cultural and intellectual context The contributors seek to identify the possible sources that may have influenced Kierkegaard's understanding and employment of Scripture and to describe the debates about the Bible that may have shaped perhaps indirectly his attitudes toward Scripture They also pay close attention to Kierkegaard's actual hermeneutic practice analyzing the implicit interpretive moves that he makes as well as his more explicit statements about the significance of various biblical passages This close reading of Kierkegaard's texts elucidates the unique and sometimes odd features of his frequent appeals to Scripture This volume in the series devotes one tome to the Old Testament and a second tome to the New Testament Tome I considers the canonically disputed literature of the Apocrypha Although Kierkegaard certainly cited the Old Testament much less frequently than he did the New passages and themes from the Old Testament do occupy a position of startling importance in his writings Old Testament characters such as Abraham and Job often play crucial and even decisive roles in his texts Snatches of Old Testament wisdom figure prominently in his edifying literature The vocabulary and cadences of the Psalms saturate his expression of the range of human passions from joy to despair The essays in this first tome seek to

the texts produced during the Palaeologan era extending as well till the end of 15th c in ex Byzantine territories By shedding light on the translation activity of late Byzantine scholars this volume aims at revealing the cultural aspect of late Byzantine openness to its neighbours *Proceedings Pathological Society of Philadelphia*,1906 *The Cognitive Artifacts of Designing* Willemien Visser,2006-08-08 In this dynamic review and synthesis of empirical research and theoretical discussion of design as cognitive activity Willemien Visser reconciles and integrates the classical view of design as conceptualized by Herbert Simon s symbolic information processing approach with modern views of design such as the situativity approach as formulated by Donald Schon The author goes on to develop her own view on design in which design is most appropriately characterized as a construction of representations She lays the groundwork for the integration of design research and cognitive science This seemingly simple framework has implications that set the stage for this mutually beneficial integration *Bulletin of the New York Public Library* New York Public Library,1927 *Philosophical Transactions of the Royal Society of London* Royal Society (London),1832 *Philosophical Transactions of the Royal Society of London* ,1832
