Among Wolves Marybeth Holleman, Gordon Haber, 2013-10-15 Alaska's wolves lost their fiercest advocate Gordon Haber when his research plane crashed in Denali National Park in 2009 Passionate tenacious and occasionally brash Haber a

former hockey player and park ranger devoted his life to Denali's wolves. He weathered brutal temperatures in the wild to document the wolves and provided exceptional insights into wolf behavior. Haber's writings and photographs reveal an astonishing degree of cooperation between wolf family members as they hunt, raise pups, and play social behaviors and traditions previously unknown. With the wolves at risk of being destroyed by hunting and trapping, his studies advocated for a balanced approach to wolf management. His fieldwork registered as one of the longest studies in wildlife science and had a lasting impact on wolf policies. Haber's field notes, his extensive journals, and stories from friends all come together in *Among Wolves* to reveal much about both the wolves he studied and the researcher himself. Wolves continue to fascinate and polarize people, and Haber's work continues to resonate.

Detweiler, 1998 **Spatial Patterns** L.A. Peletier, W.C. Troy, 2012-12-06 The study of spatial patterns in extended systems and their evolution with time poses challenging questions for physicists and mathematicians alike. Waves on water, pulses in optical fibers, periodic structures in alloys, folds in rock formations, and cloud patterns in the sky: patterns are omnipresent in the world around us. Their variety and complexity make them a rich area of study. In the study of these phenomena, an important role is played by well-chosen model equations which are often simpler than the full equations describing the physical or biological system but still capture its essential features. Through a thorough analysis of these model equations, one hopes to glean a better understanding of the underlying mechanisms that are responsible for the formation and evolution of complex patterns. Classical model equations have typically been second-order partial differential equations. As an example, we mention the widely studied Fisher-Kolmogorov or Allen-Cahn equation originally proposed in 1937 as a model for the interaction of dispersal and fitness in biological populations. As another example, we mention the Burgers equation proposed in 1939 to study the interaction of diffusion and nonlinear convection in an attempt to understand the phenomenon of turbulence. Both of these are nonlinear second-order diffusion equations.

billion o Our country spends 12 billion a month or 144 billion year on the Iraq and Afghanistan wars ostensibly to protect oil only to raise prices The author s long experience with the Greenhouse Effect has led him to believe that methane not carbon dioxide could well be the critical gas of concern for there is potential for global warming to cascade into what he terms the Venus Syndrome The closing chapter speculates on a hypothesis regarding mega tsunamis 100 meter waves from landslides While simple solutions are suggested the problem is the inability of our civilization to agree on a workable strategy which is further weakened by the lack of will on part of the general populace Thus the reader is urged to help make that crucial difference Instructions and examples are provided on how to attain Rainbow Vision to carry out this mission for a better Planet Earth The simplest solution is for everyone to join in on the effort

The End of the World in Scandinavian Mythology Anders Hultgård,2022-09-19 The End of the World in Scandinavian Mythology is a detailed study of the Scandinavian myth on the end of the world the Ragnar k and its comparative background The Old Norse texts on Ragnar k in the first place the Prophecy of the Seeress and the Prose Edda of the Icelander Snorri Sturluson are well known and much discussed However Anders Hultgård suggests that it is worthwhile to reconsider the Ragnar k myth and shed new light on it using new comparative evidence and presenting texts in translation that otherwise are available only to specialists The intricate question of Christian influence on Ragnar k is addressed in detail with the author arriving at the conclusion of an independent pre Christian myth with the closest analogies in ancient Iran People in modern society are concerned with the future of our world and we can see these same fears and hopes expressed in many ancient religions transformed into myths of the future including both cosmic destruction and cosmic renewal The Ragnar k myth can be said to be the classical instance of such myths making it more relevant today than ever before

Steps of the Plowman Dale Miettinen,2004 In the late spring and early summer of 2002 a serial killer is on the prowl in a city of almost a million people By mid June there are five bodies Uniquely there is no public panic The reason The only people aware of the murders are a small group of police investigators Such secrecy was implemented not only to avoid hysteria but because rumors exist that the perpetrator is either a current or former member of the local police Another cause for the close confidentiality emanates from the fact that all five victims were high risk predatory pedophiles recently released from prison The story deals in part with the personalities of the killer his victims and the impact on the people that were preyed upon by these pedophiles As the tale unfolds there are self examinations by the police prosecutors officials in the justice system and a young defense lawyer In addition a member of the judiciary is persuaded that the entire system has contaminated the law that allegedly protects children from monsters Political will and effectiveness and the ever present media also surface The five bodies are discovered within a ten day period Physical evidence is practically non existent Another contributing factor surrounding the pressure on

the police team to solve the murders as quickly as possible concerns the perception of their motivation to interrupt the vigilante before he s finished The investigators don t want to be seen as dragging their ass The initial stages of the investigation are discouraging but as the police plod their way a description of a suspect emerges His identity of course is a different story A profile develops with a full description of an older man seen in the company of the first three local victims hours before they are found dead The only thing is who the hell is he It soon becomes clear that the old man has inside help on locating the pedophiles The police hope that it s not someone from their department A break and a coincidence provide identification of the suspect and a widowed senior citizen becomes the focus of the investigation The police team sets up two types of surveillance and obtains a photograph of the man His photo is identified without any hesitation by three witnesses and later two more A circumstantial case is presented to the prosecutors They believe enough evidence exists and like the police feel that physical evidence will surface after the arrest Wrong An omission perhaps inadvertent is discovered by the old man s legal aid lawyer in the police report given to the prosecutor s office This is enough to secure the freedom of the accused judicial interim release Two nights later the old man rehabilitates another dangerous pedophile at his own home This little escapade becomes more complicated and results in solidifying a case against the old man His lawyer has other plans however Her client tells her about his old friend with the justice department whose 5 year old daughter was abducted and murdered in 1998 The friend s wife was now in a mental hospital and the friend s health was slowly ebbing away since there had never been any arrest or any kind of closure The friend volunteered to work with the old man s lawyer and make a proposal to his life long friend a judge in the Court of Queen s Bench The proposal suggests that if this matter were to get into court the young lawyer would call every police officer jail guard prison psychiatrist victim and the families of every victim of all six pedophiles These witnesses would describe the impact of the intrusion of each pedophile since and including his first conviction A hearing is arranged in front of the judge much to the chagrin of a Member of Parliament and an associate of the legislature This is because they haven t yet figured it out A seventh murder is discovered early in the morning on the day of the hearing As if things were
