Networks of Trust Anthony Simon Laden, 2024-12-09 An eye opening look at how parents mistrust of colleges has less to do with what their kids are learning than with whom they come to trust Higher education is a familiar battlefield in today's culture wars The right accuses colleges and universities of indoctrinating conservative students with liberal values the left with failing to be sufficiently inclusive The anxieties expressed on both sides of the political spectrum have much in common however and they are triggered not by colleges failures but by their successes So argues philosopher Anthony Simon Laden in Networks of Trust He highlights how a college education shapes students informational trust networks the complex set of people and institutions they rely on for the information they use to think about and understand the world While the networks that colleges build for students have great value learning to inhabit them pulls some students away from their families and communities If many people distrust institutions of higher education this is one reason why Networks of Trust offers a path forward one that preserves the value while reducing the harms of a college education It includes concrete suggestions for how colleges and universities can educate students in a manner that inspires and deserves trust one that bridges rather than deepens our social divides
