Urban Coding and Planning Stephen Marshall, 2012-12-06 Urban codes have a profound influence on urban form affecting the design and placement of buildings streets and public spaces Historically their use has helped create some of our best loved urban environments while recent advances in coding have been a growing focus of attention particularly in Britain and North America However the full potential for the role of codes has yet to be realized In *Urban Coding and Planning* Stephen Marshall and his contributors investigate the nature and scope of coding its purposes the kinds of environments it creates and perhaps most importantly its relationship to urban planning By bringing together historical and ongoing traditions of coding from around the world with chapters describing examples from the United Kingdom France India China Japan Australia South Africa the United States and Latin America this book provides lessons for today s theory and practice of place making

Higher Education Pathways Ashwin, Paul, Case, Jennifer M., 2018-12-14 In what ways does access to undergraduate education have a transformative impact on people and societies What conditions are required for this impact to occur What are the pathways from an undergraduate education to the public good including inclusive economic development These questions have particular resonance in the South African higher education context which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as central to addressing skills shortages in South Africa It is also seen to yield significant social returns including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student

revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top-down leadership system of university management and its double-speak of professing to act in workers and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

The Race to Be Myself Caster Semenya, 2023-10-31. A New York Times Book Review Editors' Choice. Caster's story isn't just a tale of perseverance and poise; it's a story that makes us all interrogate our humanity and the world we build with our actions every day. An essential read. Trevor Noah. World champion runner Caster Semenya offers an empowering account of her extraordinary life and career and her trailblazing battle to compete on her own terms. Olympian and World Champion Caster Semenya is finally ready to share the vivid and heartbreaking story of how the world came to know her name. Thrust into the spotlight at just eighteen years old after winning the Berlin World Championships in 2009, Semenya's win was quickly overshadowed by criticism and speculation about her body and she became the center of a still raging firestorm about how gender plays out in sports, our expectations of female athletes and the right to compete as you are. Told with captivating speed and candor, *The Race to Be Myself* is the journey of Semenya's years as an athlete in the public eye and her life behind closed doors. From her rural beginnings running free in the dust to crushing her opponents in record time on the track to the accusations and falsehoods spread about her in the press, the legal trial she went through in order to compete and the humiliation she has been forced to endure publicly and privately. This book is a searing testimony for anyone who has been forced to stop doing what they love.

The A to Z of Careers in South Africa, 2006. *Developing University Entrepreneurial Ecosystems In Sub-Saharan Africa*. Dzidziso Samuel Kamuriwo, Sara Jones, Neil Marshall, Mary

Kinoti, 2024-12-13. What is the status of university entrepreneurship and innovation ecosystems in Sub-Saharan Africa (SSA)? How could they be strengthened so that students, academic staff and relevant stakeholders that are part of the ecosystems can best produce better quality ventures, i.e. that can employ more people or make venture founders more employable? This book provides a current review of the state of teaching entrepreneurship and its impact on SSA and illuminates different

ways universities are strengthening their university entrepreneurship and innovation ecosystems Different approaches in the book fall into four thematic sections namely 1 the exploitation of digital infrastructure to design and deploy virtual accelerators so as to enhance both scale and reach of entrepreneurship education 2 the use of a social entrepreneurship lens to illuminate how key stakeholders can work together as well as communicate policy changes that need to be incorporated for effective implementation of ecosystems 3 ecosystem developments that focus exploiting sector specific knowledge and expertise and lastly 4 ecosystem design considerations such as factors for effective ecosystem design and curriculum development in SSA Significant outcomes from the book are highlights of how academic entrepreneurship can be harnessed to overcome challenges facing SSA The book showcases how digital technologies can be exploited to mainstream entrepreneurship and innovation within and beyond the universities thus improving access to quality education and resources to a much broader audience access In addition the book demonstrates how to effectively engage all relevant stakeholders in an entrepreneurship ecosystem including how to accurately identify all key stakeholders and assess their contextual needs in SSA education settings so as to inform ecosystem development strategies Finally the book showcases different approaches to entrepreneurship curriculum developments efforts what it takes to develop pilot or enhance curriculum in SSA as well as how provision of more support for students with specific mechanisms can be offered including different ways of including mentoring coaching or incubation and building academic industry partnership as a way of supporting students
