Quicklet on Mitch Albom's Tuesdays with Morrie Joseph Pritchard, 2011-12-14 ABOUT THE BOOK Throughout our lives we have all encountered at one point or another people who have taught us some new insight about life the universe and our place in it A beloved grandparent passing on the wisdom they have collected throughout the years or a teacher whose guidance was instrumental in forming us into the person we are today For Mitch Albom the person who made that difference in his life was Morrie Schwartz Tuesdays with Morrie chronicles a professor's final lecture to his former student with whom he reconnects in his final days The book has sold over 14 million copies to date and has more than 50 editions the world over At its core the book really tells two stories On one hand it narrates Morrie's final lessons for Mitch Albom But it also talks about Morrie's rich and colorful life Both stories are framed in the context of Tuesday lessons which is where the book gets its title MEET THE AUTHOR Joseph Pritchard is a passionate reader and writer He has a bachelor's degree in Biology and also completed a degree in medicine He has written for other prominent online publications and enjoys writing on a variety of topics EXCERPT FROM THE BOOK Because the book's focus is on Mitch and Morrie much of the narrative is told via flashbacks that highlight moments in the lives of both men The story begins at the end of Mitch's initial relationship with Morrie his college graduation During this time Mitch gives his professor a tan leather briefcase with Morrie's initials monogrammed on it He promises to stay in touch But the promise is forgotten and many years would pass before both friends are reunited Since graduating Mitch went on to become a newspaper journalist and led a life in the fastlane constantly working and traveling Prior to his success as a journalist Mitch was forced to abandon a failing musical career Mitch becomes so fixated with work that it crowds out other aspects of his life

Wilcox,2016-06-28 Abraham Joshua Heschel said that We are closer to God when we are asking questions than when we have the answers He believed that to be a Christian is not to be a person who knows all the answers but one who lives in the part of the self where the question is constantly being born Most of us don t think very much about our questions In our culture we are accustomed to being able to find out answers to nearly any question just by typing it into Google search or asking Siri But behind any answer there is always a question Sometimes the question isn t clear to us sometimes it is not very well articulated even to ourselves But it is always there In over thirty years as a psychotherapist and spiritual director Peter C Wilcox has seen how the questions people ask themselves have shaped their lives in some very important ways This book is an invitation to see how important it is to learn how to ask the right questions about our lives This is because our choice of questions leads us on a path of discovery towards answers that help us to grow spiritually and psychologically Our questions orient our lives and give direction to us We will see that they enable us to make fifteen choices that have a tremendous impact on the kind of person we become Reading and the Reference Librarian Juris Dilevko,Lisa Gottlieb,2014-10-16 Reference librarians are no longer expected to know much about the information they find they are merely expected to find it Technological competency rather than knowledge has become the order of the day In many respects reference service has become a matter of typing search terms into a library s online catalog or a web search engine and providing the patron with the results of the search Calling for a re intellectualization of reference librarianship this book suggests another approach to

providing quality reference service reading The authors surveyed both academic reference librarians and public library reference personnel in the United States and Canada about their reading habits From the 950 responses the authors present findings about the extent to which librarians read newspapers periodicals fiction and nonfiction and recount and analyze stories about how reading has made them better librarians The authors also report that North American professors in the humanities and social sciences believe that the best reference librarians are those who have wide ranging subject based knowledge as opposed to the type of process based functional knowledge that is increasingly dominating the curricula of many Library and Information Science programs
