Peoples of the Tundra John P. Ziker, 2002-04-11 On ethnographic grounds alone Ziker's book is a unique and valuable contribution. Despite increased fieldwork opportunities for foreigners in the former Soviet Union in recent years, much of Russia and Siberia remains terra incognita to Western scholars except for specialists who know the Russian literature. Ziker's account of the Dolgan and Nganasan peoples of the Ust'-Avam community is a fascinating analysis of how people adapt their hunting, fishing, and herding not only to the demanding Arctic environment but also to enormous economic and political adversities created in the wake of the Soviet Union's collapse. In this sense, the book fills a gap in the ethnographic literature on Siberia for Western students and at the same time serves as a microcosm of the devastating changes affecting rural communities and indigenous peoples generally in a disintegrating former superpower that is increasing isolation and a shift to nonmarket survival economies.

Holten, Barrie Maxwell, Ulf Molau, Bjartmar Sveinbjörnsson, 2012-12-06 Global warming is likely to have the greatest impact at high latitudes, making the Arctic an important region both for detecting global climate change and for studying its effects on terrestrial ecosystems.
