had an impact on program design and materials development. One significant change is that the choice of a teaching method is no longer the primary concern. Instead, the first step for the program designer is becoming familiar with the social and cultural features of the context of the language being taught. This includes a consideration of the uses speakers make of the language, their reasons for using it, and their attitudes toward it. Contexts of Competence: Social and Cultural Considerations. In *Communicative Language Teaching*, we explore the relationship between context and competence from a theoretical and practical perspective. Its audience is applied linguists in general and language teaching practitioners in particular. The overall aim of its five chapters is to provide a framework for consideration of various contexts of language learning and use and to guide the implementation and development of models of communicative language teaching that are responsive to the context-specific needs of learners.
