The Globalization Myth Shannon K. O'Neil,2022-10-18 A case for why regionalization not globalization has been the biggest economic trend of the past forty years The conventional wisdom about globalization is wrong Over the past forty years as companies money ideas and people went abroad more often than not they looked regional rather than globally O Neil details this transformation and the rise of three major regional hubs in Asia Europe and North America Current technological demographic and geopolitical trends look only to deepen these regional ties O Neil argues that this has urgent implications for the United States Regionalization has enhanced economic competitiveness and prosperity in Europe and Asia It could do the same for the United States if only it would embrace its neighbors **Research Handbook on Global**
