Blindspot Mahzarin R. Banaji, Anthony G. Greenwald, 2016-08-16 Accessible and authoritative While we may not have much power to eradicate our own prejudices we can counteract them The first step is to turn a hidden bias into a visible one What if we're not the magnanimous people we think we are The Washington Post I know my own mind I am able to assess others in a fair and accurate way These self-perceptions are challenged by leading psychologists Mahzarin R Banaji and Anthony G Greenwald as they explore the hidden biases we all carry from a lifetime of exposure to cultural attitudes about age gender race ethnicity religion social class sexuality disability status and nationality Blindspot is the authors metaphor for the portion of the mind that houses hidden biases Writing with simplicity and verve Banaji and Greenwald question the extent to which our perceptions of social groups without our awareness or conscious control shape our likes and dislikes and our judgments about people's character abilities and potential In Blindspot the authors reveal hidden biases based on their experience with the Implicit Association Test a method that has revolutionized the way scientists learn about the human mind and that gives us a glimpse into what lies within the metaphoric blindspot The title's good people are those of us who strive to align our behavior with our intentions The aim of Blindspot is to explain the science in plain enough language to help well intentioned people achieve that alignment By gaining awareness we can adapt beliefs and behavior and outsmart the machine in our heads so we can be fairer to those around us Venturing into this book is an invitation to understand our own minds Brilliant authoritative and utterly accessible Blindspot is a book that will challenge and change readers for years to come Praise for Blindspot Conversational easy to read and best of all it has the potential at least to change the way you think about yourself Leonard Mlodinow The New York Review of Books Banaji and Greenwald deserve a major award for writing such a lively and engaging book that conveys an important message Mental processes that we are not aware of can affect what we think and what we do Blindspot is one of the most illuminating books ever written on this topic Elizabeth F Loftus Ph.D distinguished professor University of California Irvine past president Association for Psychological Science author of Eyewitness Testimony

Machine Learning Toolbox for Social Scientists Yigit Aydede, 2023-09-22 Machine Learning Toolbox for Social Scientists covers predictive methods with complementary statistical tools that make it mostly self contained The inferential statistics is the traditional framework for most data analytics courses in social science and business fields especially in Economics and Finance The new organization that this book offers goes beyond standard machine learning code applications providing intuitive backgrounds for new predictive methods that social science and business students can follow The book also adds many other modern statistical tools complementary to predictive methods that cannot be easily found in econometrics textbooks nonparametric methods data exploration with predictive models penalized regressions model selection with sparsity dimension reduction methods nonparametric time series predictions graphical network analysis algorithmic optimization methods classification with imbalanced data and many others This book is targeted at students and researchers who have no advanced statistical background but instead coming from the tradition of inferential statistics The modern statistical methods the book provides allows it to be effectively used in teaching in the social science and business fields Key Features The book is structured for those who have been trained in a traditional statistics curriculum There is one long initial section that covers the differences in estimation and prediction for people trained for causal analysis The book develops a background framework for Machine learning applications from Nonparametric methods SVM and NN simple enough without too much detail It s self sufficient Nonparametric time series predictions are new and covered in a separate section Additional sections are added Penalized Regressions Dimension Reduction Methods and Graphical Methods have been increasing in their popularity in social sciences
