Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative

Hollywood Fantasies of Miscegenation Susan Courtney, 2021-12-07 *Hollywood Fantasies of Miscegenation* analyzes white fantasies of interracial desire in the history of popular American film From the first interracial screen kiss of 1903 through the Production Code's nearly thirty year ban on depictions of miscegenation to the contemplation of mixed marriage in *Guess Who's Coming to Dinner* 1967 this book demonstrates a long popular yet underexamined record of cultural fantasy at the movies With ambitious new readings of well known films like D W Griffith's 1915 epic *The Birth of a Nation* and of key forgotten films and censorship documents Susan Courtney argues that dominant fantasies of miscegenation have had a profound impact on the

form and content of American cinema What does it mean Courtney asks that the image of the black rapist became a virtual cliché while the sexual exploitation of black women by white men under slavery was perpetually repressed What has this popular film legacy invited spectators to remember and forget How has it shaped our conceptions of and relationships to race and gender Richly illustrated with more than 140 images *Hollywood Fantasies of Miscegenation* carefully attends to cinematic detail revising theories of identity and spectatorship as it expands critical histories of race sex and film Courtney's new research on the Production Code's miscegenation clause also makes an important contribution inviting us to consider how that clause was routinely interpreted and applied and with what effects
