Finden, Carlos Yebra López, Tarela Ike, Ugo Gaudino, Samwel Oando, 2024-01-04 This interdisciplinary book presents an intervention into methodological practices in the subfield of Critical Terrorism Studies and features established and early career scholars The volume interrogates the role that research methods play in shaping the sub discipline of Critical Terrorism Studies CTS It responds to two major methodological gaps within CTS 1 the dearth of Global South cases and voices and decolonial and feminist approaches and 2 the lack of engagement with traditional

disciplines and quantitative methods Together authors demonstrate that interdisciplinary methodological dialogues can open up new possibilities for researchers seeking pathways towards and definitions of emancipation social justice and freedom from violence Simultaneously the book shows that by focusing on the possibilities that methodologies open up to us and by maintaining a commitment to reflexive practice we expand our understandings of what are legitimate and acceptable forms of research thus challenging the Critical Terrorism Studies divide The chapters draw upon a wide range of empirical cases including Nigeria Kenya France Brazil and the UK focusing on three key issues within Critical Terrorism Studies its own relationship with and perpetuation of epistemic violence decolonial postcolonial Global South feminist and queer approaches and more traditional approaches and methods as a means to interrogate the methodological binary between Critical Terrorism Studies and Terrorism Studies This book will be of much interest to students of critical terrorism studies counter terrorism security studies and International Relations in general

Beyond Rust Allen Dieterich-Ward,2016 Beyond Rust chronicles the rise fall and rebirth of metropolitan Pittsburgh an industrial region that once formed the heart of the world s steel production and is now touted as a model for reviving other hard hit cities of the Rust Belt Writing in clear and engaging prose historian and area native Allen Dieterich Ward provides a new model for a truly metropolitan history that integrates the urban core with its regional hinterland of satellite cities white collar suburbs mill towns and rural mining areas Pittsburgh reached its industrial heyday between 1880 and 1920 as vertically integrated industrial corporations forged a regional community in the mountainous Upper Ohio River Valley Over subsequent decades metropolitan population growth slowed as mining and manufacturing employment declined Faced with economic and environmental disaster in the 1930s Pittsburgh s business elite and political leaders developed an ambitious program of pollution control and infrastructure development The public

private partnership behind the Pittsburgh Renaissance as advocates called it pursued nothing less than the selective erasure of the existing social and physical environment in favor of a modernist functionally divided landscape a goal that was widely copied by other aging cities and one that has important ramifications for the broader national story Ultimately the Renaissance vision of downtown skyscrapers sleek suburban research campuses and bucolic regional parks resulted in an uneven transformation that tore the urban fabric while leaving deindustrializing river valleys and impoverished coal towns isolated from areas of postwar growth Beyond Rust is among the first books of its kind to continue past the collapse of American manufacturing in the 1980s by exploring the diverse ways residents of an iconic industrial region sought places for themselves within a new economic order Golden Growth Indermit S. Gill, Martin Raiser, 2012-04-25 The public debt crisis in Europe has shaken the confidence not just in the Euro but in the European model Aging and uneconomical Europeans are being squeezed between innovative Americans and efficient Asians it is said With debt and demographics dragging down them down one hears that European economies will not grow much unless radically new ways are discovered The end of complacency in Europe is a good thing but this loss of confidence could be dangerous The danger is that in a rush to rejuvenate growth the attractive attributes of the European development model could be abandoned along with the weak In fact the European growth model has many strong points and enviable accomplishments One can say without exaggeration that Europe had invented a convergence machine taking in poor countries and helping them become high income economies World Bank research has identified 27 countries that have grown from middle income to high income since 1987 a few thanks to the discovery and exploitation of massive natural resources e g oil in Oman and Trinidad and Tobago several others like Japan Hong Kong Singapore Taiwan and South Korea embracing aggressive export led strategies which involved working and saving a lot postponing political liberties and looking out only for themselves But half of the countries that have grown from middle income to high income Croatia Cyprus Czech Republic Estonia Greece Hungary Latvia Malta Poland Portugal Slovak Republic and Slovenia are actually in Europe This is why the European model was so attractive and unique and why with some well designed efforts it ought to be made right again **Business Law, Objective Questions and Explanations** Irvin N.
