The Holocaust And Historical Methodology Making Sense Of History:

The Holocaust and Historical Methodology Dan Stone, 2012 This book is timely and necessary and often extremely challenging It brings together an impressive cast of scholars spanning several academic generations Anyone interested in writing about the Holocaust should read this book and consider the implications of what is written here for their own work There seems to me little doubt that Holocaust history writing stands at something of a cross roads and the ways forward that this volume points to are extremely thought provoking Tom Lawson University of Winchester

The Holocaust and Historical Methodology Dan Stone, 2012-08-01 In the last two decades our empirical knowledge of the Holocaust has been vastly expanded Yet this empirical blossoming has not been accompanied by much theoretical reflection on the historiography This volume argues that reflection on the historical process of re constructing the past is as important for understanding the Holocaust and by extension any past event as is archival research It aims to go beyond the dominant paradigm of political history and describe the emergence of methods now being used to reconstruct the past in the context of Holocaust historiography

Making Sense in History Andrew Szanajda, 2007 Making Sense in History provides a guide for history students and teachers This work provides descriptions and analysis of several approaches for writing history While the focus is on how history has been written the methods that are researched in the book are suitable as a reference work for college level history students and teachers It provides an overview of how research has been undertaken and how authors throughout history have written history Most works of this type deal with either the philosophy of history methodology for writing history or historiography This work combines

How to Write About the Holocaust Theodor Pelekanidis, 2022-05-05 How to Write About the Holocaust is a contribution to ongoing debates in historiography and Holocaust studies More specifically it combines the theoretical framework that has developed in historiography in the last half a century with the demands of Holocaust representation The first part of the book analyzes the newest trends in theory of history focusing especially on postmodernism starting from the works of the American historian and theorist Hayden White and tracing the genealogy of the postmodern influence in history both from an epistemological and from a political perspective The second part continues by incorporating these theoretical developments into specific written examples on the Holocaust By analyzing major works about it including Saul Friedlander's and Dan Stone's histories of the Holocaust the book attempts to answer questions like what is the most appropriate way to write about the Holocaust and what can theory teach us about the practice of history To conclude the volume explores the connection between history and literature and asks if the distinction between fact and fiction has become outdated

Viktor Frankl's Search for Meaning Timothy Pytell, 2015-10-01 This is a scholarly commendable biography and intellectual history Lay readers will be challenged psychologists and historians will be grateful Library Journal starred review First published in 1946 Viktor Frankl's memoir Man's Search for Meaning remains one of the most influential books of the last century selling over ten million copies

worldwide and having been embraced by successive generations of readers captivated by its author's philosophical journey in the wake of the Holocaust. This long overdue reappraisal examines Frankl's life and intellectual evolution anew from his early immersion in Freudian and Adlerian theory to his development of the third Viennese school amid the National Socialist domination of professional psychotherapy. It teases out the fascinating contradictions and ambiguities surrounding his years in Nazi Europe including the experimental medical procedures he oversaw in occupied Austria and a stopover at the Auschwitz concentration camp far briefer than has commonly been assumed. Throughout, author Timothy Pytell gives a penetrating but fair-minded account of a man whose paradoxical embodiment of asceticism, celebrity, tradition, and self-reinvention drew together the complex strands of twentieth-century intellectual life. From the introduction: At the same time, Frankl's testimony, second only to the Diary of Anne Frank, popularity has raised the ire of experts on the Holocaust. For example, in the 1990s the United States Holocaust Memorial Museum in Washington purportedly refused to sell *Man's Search for Meaning* in the gift shop. During the late 1960s and early 1970s, Frankl became very popular in America. Frankl's survival of the Holocaust, his reassurance that life is meaningful, and his personal conviction that God exists served to make him a forerunner of the self-help genre.

Benevolent Colonizers in Nineteenth-Century Australia Eva Bischoff, 2020-01-02. This book reconstructs the history of a group of British Quaker families and their involvement in the process of settler colonialism in early nineteenth-century Australia. Their everyday actions contributed to the multiplicity of practices that displaced and annihilated Aboriginal communities. Simultaneously, early nineteenth-century Friends were members of a translocal, transatlantic community characterized by pacifism and an involvement in transnational humanitarian efforts such as the abolitionist and the prison reform movements, as well as the Aborigines Protection Society. Considering these ideals, how did Quakers negotiate the violence of the frontier? To answer this question, the book looks at Tasmanian and South Australian Quakers' lives and experiences, their journeys, and their writings. Building on recent scholarship on the entanglement between the local and the global, each chapter adopts a different historical perspective in terms of breadth and focused time period. The study combines these different takes to capture the complexities of this topic and era.

Jewish Histories of the Holocaust Norman J.W. Goda, 2014-09-01. For many years, histories of the Holocaust focused on its perpetrators, and only recently have more scholars begun to consider in detail the experiences of victims and survivors, as well as the documents they left behind. This volume contains new research from internationally established scholars. It provides an introduction to and overview of Jewish narratives of the Holocaust. The essays include new considerations of sources ranging from diaries and oral testimony to the hidden Oyneg Shabbes archive of the Warsaw Ghetto, arguments regarding Jewish narratives and how they fit into the larger fields of Holocaust and Genocide studies, and new assessments of Jewish responses to mass murder ranging from ghetto leadership to resistance and memory.

The Rhythm of Eternity Robbert-Jan Adriaansen, 2015-07-01. The Weimar era in Germany is often characterized as a time of significant change. Such periods of

rupture transform the way people envision the past present and future This book traces the conceptions of time and history in the Germany of the early 20th century By focusing on both the discourse and practices of the youth movement the author shows how it reinterpreted and revived the past to overthrow the premises of modern historical thought In so doing this book provides insight into the social implications of the ideological de historicization of the past **Marking Evil** Amos

Goldberg,Haim Hazan,2015-05-01 Talking about the Holocaust has provided an international language for ethics victimization political claims and constructions of collective identity As part of a worldwide vocabulary that language helps set the tenor of the era of globalization This volume addresses manifestations of Holocaust engendered global discourse by critically examining their function and inherent dilemmas and the ways in which Holocaust related matters still instigate public debate and academic deliberation It contends that the contradiction between the totalizing logic of globalization and the assumed uniqueness of the Holocaust generates continued intellectual and practical discontent **The Mirror of the**

Medieval K. Patrick Fazioli,2017-05-01 Since its invention by Renaissance humanists the myth of the Middle Ages has held a uniquely important place in the Western historical imagination Whether envisioned as an era of lost simplicity or a barbaric nightmare the medieval past has always served as a mirror for modernity This book gives an eye opening account of the ways various political and intellectual projects from nationalism to the discipline of anthropology have appropriated the Middle Ages for their own ends Deploying an interdisciplinary toolkit author K Patrick Fazioli grounds his analysis in contemporary struggles over power and identity in the Eastern Alps while also considering the broader implications for scholarly research and public memory **Designing Worlds** Kjetil Fallan,Grace Lees-Maffei,2016-06 From consumer products to architecture

to advertising to digital technology design is an undeniably global phenomenon Yet despite their professed transnational perspective historical studies of design have all too often succumbed to a bias toward Western industrialized nations This diverse but rigorously curated collection recalibrates our understanding of design history reassessing regional and national cultures while situating them within an international context Here contributors from five continents offer nuanced studies that range from South Africa to the Czech Republic all the while sensitive to the complexities of local variation and the role of nation states in identity construction **Doing Conceptual History in Africa** Axel Fleisch,Rhiannon Stephens,2018-02-21

Employing an innovative methodological toolkit Doing Conceptual History in Africa provides a refreshingly broad and interdisciplinary approach to African historical studies The studies assembled here focus on the complex role of language in Africa s historical development with a particular emphasis on pragmatics and semantics From precolonial dynamics of wealth and poverty to the conceptual foundations of nationalist movements each contribution strikes a balance between the local and the global engaging with a distinctively African intellectual tradition while analyzing the regional and global contexts in which categories like work marriage and land take shape **History of Intellectual Culture 3/2024** Charlotte A.

Lerg,Johan Östling,Jana Weiß,Anne Kwaschik,Claudia Roesch,2024-10-21 The third issue of the yearbook History of

Intellectual Culture HIC devotes a thematic section to experimental spaces for knowledge production. The articles in this section investigate the role of experimental environments as sites for knowledge production during the long nineteenth century thereby extending the scope beyond the confines of traditional academic institutions such as academies, laboratories, and universities. By focusing on intentional communities, colonial gardens, agricultural colonies, and artistic colonies as experimental spaces, the authors investigate the intertwined social, natural, and aesthetic aspects of environments. An overarching aim is to develop a distinct perspective rooted in the history of knowledge wherein experiments are conceptualized both as a category employed by the historical actors and as a methodological concept. In addition, the third issue comprises several individual papers covering a wide range of topics stretching from the U.S. patent system in the 1930s and anti-intellectualism in interwar Britain to the cultural translation of knowledge in the wake of the Holocaust and the circulation of economic knowledge in postwar Sweden. The issue also contains several theoretical, historiographical, and methodological interventions and reflections, including a conversation on decolonizing knowledge in academia and beyond.

Histories of the Holocaust Dan Stone, 2010-06-17. A comprehensive and accessible guide to the major themes and debates in Holocaust historiography over the last two decades. *A Lover's Quarrel with the Past* Ranjan Ghosh, 2012-06-01. Although not a professional historian, the author raises several issues pertinent to the state of history today. Qualifying the non-historian as an able interventionist in historical studies, the author explores the relationship between history and theory within the current epistemological configurations and refigurations. He asks how history transcends the obsessive linguistic turn which has been hegemonizing literary discourse analysis and focuses greater attention on historical experience and where history stands in relation to our understanding of ethics, religion, and the current state of global politics that underlines the manipulation and abuse of history.

Contesting Deregulation Knud Andresen, Stefan Müller, 2017-09-01. Few would dispute that many Western industrial democracies undertook extensive deregulation in the 1970s and 1980s. Yet this narrative in its most familiar form depends upon several historiographical assumptions that bely the complexities and pitfalls of studying the recent past. Across thirteen case studies

the contributors to this volume investigate this deregulatory moment from a variety of historical perspectives including transnational comparative pan European and national approaches Collectively they challenge an interpretive framework that treats individual decades in isolation and ignores broader trends that extend to the end of the Second World War

Foundational Pasts Alon Confino, 2011-09-26 Alon Confino seeks to rethink dominant interpretations of the Holocaust by examining it as a problem in cultural history As the main research interests of Holocaust scholars are frequently covered terrain the anti Semitic ideological campaign the machinery of killing the brutal massacres during the war Confino's research goes in a new direction He analyzes the culture and sensibilities that made it possible for the Nazis and other Germans to imagine the making of a world without Jews Confino seeks these insights from the ways historians interpreted another short violent and foundational event in modern European history the French Revolution The comparison of the ways we understand the Holocaust with scholars' interpretations of the French Revolution allows Confino to question some of the basic assumptions of present day historians concerning historical narration explanation and understanding

Narrative Desire and Historical Reparations Timothy Gauthier, 2013-10-15 This book examines and explains the obsession with history in the contemporary British novel It frames these historical novels as expressions of narrative desire highlighting the reciprocal relationship between a desire to disclose and to rid ourselves of anxieties elicited by the past Scrutinizing representative novels from Byatt McEwan and Rushdie contemporary fiction is revealed as capable of advocating a viable ethical stance and as a form of authentic commentary Our anxieties often exist in response to what might be perceived as the oppression or eradication of values whether this is through the modern repudiation of Victorian principles Byatt the Western rethinking of Enlightenment narratives in light of the Holocaust McEwan or pluralism threatened by religious fundamentalism Rushdie Each of these novelists differentially employs postmodern artifice sometimes as a way to reject the notion of historical construction sometimes to advocate for it but always to bring us closer to what the author believes are significant values and truths rather than relativism The representative qualities of these novels serve to highlight themes concerns and anxieties present in many of the works of each author and by extension those of their contemporaries
