Towards A New Executive Order In Europe:

Towards A New Executive Order In Europe? Deirdre Curtin, Morten Egeberg, 2013-09-13 The executive branch of government in Europe is being gradually transformed in several significant respects First executive power has been continuously strengthened at the EU level in the form of the European Commission EU level agencies and diplomatic and military staff in the Union Council secretariat Second EU executive bodies relate directly to regulatory authorities at the national level in charge of applying and partly preparing EU laws and programmes partly circumventing ministerial departments Thus parts of national administrations become parts of an integrated and multi level Union administration as well as parts of national executives Such a system with multiple political masters raises delicate questions about political steering and accountability This book focuses on this fascinating development both from a political science and a legal perspective encompassing the consolidation of the supranational executive as well as its relationships with its partners at the national level This book was published as a special issue of West European Politics

Political Accountability and European Integration L. F. M. Verhey, Philipp Kiiver, Sandor Loeffen, 2009 This volume addresses the future of political control and accountability in a European and comparative perspective It is based on the contributions to an international conference hosted by the Montesquieu Institute Center of European Parliamentary History and Constitutional Development at Maastricht in March 2008 The conference concluded a larger research project that was devoted to identifying features of domestic constitutional law that could help develop a system of effective accountability for the European Union

The Oxford Handbook of Political Executives Rudy B. Andeweg, Robert Elgie, Ludger Helms, Juliet Kaarbo, Ferdinand Müller-Rommel, 2020-07-30 Political executives have been at the centre of public and scholarly attention long before the inception of modern political science In the contemporary world political executives have come to dominate the political stage in many democratic and autocratic regimes The Oxford Handbook of Political Executives marks the definitive reference work in this field Edited and written by a team of world class

scholars it combines substantive stocktaking with setting new agendas for the next generation of political executive research

Power and Legitimacy Peter L. Lindseth, 2010 The implications of European integration for national democracy and constitutionalism are well known Nevertheless as the events of the last decade made clear the EU's complex system of governance has been unable to achieve a democratic or constitutional legitimacy in its own right In Power and Legitimacy Reconciling Europe and the Nation State Peter L Lindseth traces the roots of this paradox to integration's dependence on the postwar constitutional settlement of administrative governance on the national level Supranational policymaking has relied on various forms of oversight from national constitutional bodies following models that were first developed in the administrative state and then translated into the European context These national oversight mechanisms executive legislative and judicial have over the last half century developed to address the central disconnect in the integration process between the need for supranational regulatory power on the one hand and the persistence of national constitutional legitimacy on the other In defining the ways European public law has sought to reconcile these two conflicting demands Professor Lindseth lays the foundation for a better understanding of the administrative not constitutional nature of European governance going forward

Towards a new regulatory framework for GM crops in the European Union Escajedo San-Epifanio Escajedo San-Epifanio, 2023-08-07 Aware of the significant potential of nascent biotechnologies the European Economic Community the predecessor to the European Union was one of the first regions in the world to develop a regulatory framework for them Back in the 1980s the objective of Community member countries was to strengthen the standards of consensus and collaboration and of environmental and health safety as well as to promote an industrial sector of enormous potential In spite of all effort towards the end of the 1990s it was a widely accepted fact that a number of political and economic factors were blocking the development of biotechnology in Europe From that crisis emerged what in some aspects is probably the most comprehensive and rigorous body of regulations for biotechnology in the world today However the very high technical level of those regulations did not prevent a new crisis which EU institutions aim to solve with a new regulatory framework Thus since March 2015 the way towards the third regulatory framework for Biotechnology in the EU has been open Will this third regulatory framework finally offer sufficient guarantees to allow a healthy and sustainable development of biotechnology in the EU What do we need to do so that third time is lucky In this work a group of European and non European experts from different disciplines and approaches discuss the past and the present as well as the various possible futures of Genetically Modified Crops in the EU

The European Union Legal Order After Lisbon Patrick Birkinshaw, Mike Varney, 2010-01-01 In June 2009 the Institute of European Public Law of the University of Hull assembled a range of experts in relevant fields to offer papers and reach some consensus on what has been achieved in the EU legal order and what the future holds for that order given local tensions and global uncertainty

The Palgrave Handbook of Public Administration and Management in Europe Edoardo Ongaro, Sandra Van Thiel, 2017-11-27 This Handbook offers a systematic review of state of the art knowledge

on public administration in Europe Covering the theoretical epistemological and practical aspects of the field it focuses on how public administration operates and is studied in European countries In sixty three chapters written by leading scholars this Handbook considers the uniqueness of the European situation through an interdisciplinary and comparative lens focusing on the administrative diversity which results from the multiplicity of countries languages schools of thought and streams of investigation across Europe It addresses issues such as multi level administration and governance intensive cross country cooperation in administrative reform policy and public accountability under different systems It also considers the issue of welfare service delivery at a time of major economic and societal challenges as well as understudied emerging issues like Islamic Public Administration and the dynamics of public sector negotiations With contributions from key experts in Public Administration and Public Management this cutting edge Handbook offers a significant contribution to the field of comparative public administration policy and management *Self-Constitution of European Society* Jiří Přibáň, 2016-05-26

Recent social and political developments in the EU have clearly shown the profound structural changes in European society and its politics Reflecting on these developments and responding to the existing body of academic literature and scholarship this book critically discusses the emerging notion of European constitutionalism its varieties and different contextualization in theories of EU law general jurisprudence sociology of law political theory and sociology The contributors address different problems related to the relationship between the constitutional state and non state constitutionalizations and critically analyze general theories of constitutional monism dualism and pluralism and their juridical and political uses in the context of EU constitutionalism Individual chapters emphasize the importance of interdisciplinary and socio legal methods in the current research of EU constitutionalism and their potential to re conceptualize and re think traditional problems of constitutional subjects limitation and separation of power political symbolism and identity politics in Europe This collection simultaneously describes the EU and its self constitution as one polity differentiated society and shared community and its contributors conceptualize the sense of common identity and solidarity in the context of the post sovereign multitude of European society **Democracy, Federalism, the European Revolution, and Global Governance** Andrea

Bosco, 2020-06-10 The European Union is facing today the greatest crisis since its creation Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration However few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction democracy and federalism and the first who tried to realise in June 1940 a European federation on the basis of an Anglo French union This volume traces the fundamental stages of the European unification process placing it in relation to the wider process of world economic and political integration In particular it analyses the historical significance of the European Revolution which is identified in the overcoming of the nation state namely the modern political formula which institutionalised the political division of mankind and the birth of the

first truly international state The universal historical significance of the European Revolution lies in its exportability as for the other great European revolutions and therefore its potential as progressively extensible to all the states of the planet Europe was indeed the first region of the world where the barriers between national states fell and a post national political identity emerged complementary to national political identities It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized constituting a guiding principle for global governance

Rulemaking by the European Commission Carl Fredrik Bergström, Dominique Ritleng, 2016-01-22 The last few years have seen major reforms to the delegation of powers and post delegation supervision of the European Commission In light of these reforms Rulemaking by the European Commission The New System for Delegation of Powers assesses whether the new system has really affected the old doctrine of delegation of powers and if so how Specific questions answered include have the objectives of the reform been achieved and what were these objectives How does the new system affect the division of functions between the institutions of the EU and the institutional balance Has this new system affected the relationship between the EU and its Member States and if so how does it concern its citizens Presented by an interdisciplinary group of experts who have actively followed or participated in the process of reform the book is structured in four parts 1 the political and historical context in which the rule making takes place 2 the operation and functioning of the system before and after the reform 3 the legal substance of a new framework for rule making and the emerging case law from the Court of Justice of the EU and 4 the procedural dimension including the legal preconditions for non institutional actors to participate

The EU Timescape Klaus Goetz, Jan-Hinrik Meyer-Sahling, 2013-09-13 The manner in which time is institutionalized is critical to how a political system works Terms time budgets and time horizons of collective and individual political actors rights over timing sequencing and speed in decision making and the temporal properties of policy matter to the distribution of power efficiency and effectiveness of policy making and democratic legitimacy This book makes a case for the systematic study of political time in the European Union EU both as an independent and a dependent variable and highlights the analytical value added of a time centred analysis The book discusses previous scholarship on the institutionalization of political time and its consequences along the dimensions of polity politics and policy reviews dominant perspectives on political time which centre on power system performance and legitimacy and presents case studies that illustrate the importance of time in the governance of the EU This book was originally published as a special issue of Journal of European Public Policy

Theorizing Internal Security in the European Union Raphael Bossong, Mark Rhinard, 2016-10-20 This edited volume offers different theories useful for understanding and explaining European Union cooperation on internal security matters Cooperation on such matters has not only flourished over the past two decades but more recently has also become one of the most politicised or contested areas of European integration Yet academic studies in the field remain predominantly empirical or not readily accessible to new scholars The book addresses this major gap by providing a

theoretical primer with a palette of options for explaining a complicated issue area reaching across the divide of critical and more mainstream scholars that typically fragments discussion and debate

Theorizing Internal Security Cooperation in the European Union offers accessible and authoritative contributions by some of the most distinguished scholars in the field Each chapter reviews the emergence of a major theoretical approach the current state of the art for that approach and the accompanying methodological considerations before providing an empirical illustration and an outlook on further research and dialogue with other perspectives This book will serve as a central reference for developing our understanding of EU internal security cooperation for exploring the ongoing transformation of statehood and for illuminating the contemporary evolution of the European Union

Practices of Inter-Parliamentary Coordination in International Politics Ben Crum, John Erik Fossum, 2014-09-01

Parliaments risk becoming the main losers of internationalisation a process that privileges executives and experts Still parliamentarians have developed a range of responses to catch up with international decision making they coordinate their actions with other parliamentarians engage in international parliamentary forums and some even opt to pursue political careers at the supranational level such as in the European Parliament This volume provides a thorough empirical examination of how an internationalising context drives parliamentarians to engage in inter parliamentary coordination how it affects their power positions vis vis executive actors among themselves and in society in general Furthermore building upon these empirical insights the book assesses whether parliamentary democracy can remain sustainable under these changing conditions Indeed if parliaments are and remain central to our understanding of modern democracy it is of crucial importance to track their responses to internationalisation the fragmentation of political sovereignty and the proliferation of multilevel politics

The Democratisation of EU International Relations Through EU Law Juan Santos Vara, Soledad Rodríguez Sánchez-Tabernero, 2018-07-27

Since the entry into force of the Treaty of Lisbon key improvements have occurred in the democratisation of EU international relations through the increased powers of the European Parliament Nevertheless a comprehensive legal analysis of the new developments in democratic control of EU external action has not yet been performed This book aims to improve the understanding of the set of mechanisms through which democratic control is exerted over EU external action in times of profound transformations of the legal and political architecture of the European integration process It analyses the role of the Court of Justice in the democratisation of international relations through EU law and further provides a legal overview of the role of the European Parliament in the conduct of the EU s international relations In those areas where the powers of the Parliament have greatly increased the book aims to raise questions as to whether this enhanced position has contributed to a more consistent external action At the same time the book aims to contribute to the debate on judicial activism in connection with the democratisation of EU external action It offers the reader a detailed and topical analysis of the recent developments in democratic control of external action which are of relevance in the daily practice of EU external relations lawyers including the topic of mixed
