*Transgenerational Media Industries* Derek Johnson, 2019-11-12 Within corporate media industries adults produce children's entertainment. Yet children, presumed to exist outside the professional adult world, make their own contributions to it, creating and posting unboxing videos, for example, that provide content for toy marketers. Many adults meanwhile avidly consume entertainment products nominally meant for children. Media industries reincorporate this market, disrupting participation into their strategies, even turning to adult consumers to pass fandom to the next generation. Derek Johnson presents an innovative perspective that looks beyond the simple category of kids media to consider how entertainment industry strategies invite producers and consumers alike to cross boundaries between adulthood and childhood, professional and amateur, new media and old. Revealing the social norms, reproductive ideals, and labor hierarchies on which such transformations depend, he identifies the lines of authority and power around which legacy media institutions like television, comics, and toys imagine their futures in a digital age. Johnson proposes that it is not strategies of media production but of media reproduction that are most essential in this context. To understand these critical intersections, he investigates transgenerational industry practice in television co-viewing, recruitment of adult comic readers as youth outreach ambassadors, media professionals' identification with childhood, the branded management of adult fans of LEGO, and the labor of child YouTube video creators. These dynamic relationships may appear to disrupt generational and industry boundaries alike. However, by considering who media industries empower when generating the future in these reproductive terms and who they leave out, Johnson ultimately demonstrates how their strategies reinforce existing power structures. This book makes vital contributions to media studies in its fresh approach to the intersections of adulthood and childhood, its attention to the relationship between legacy and digital media industries, and its advancement of dialogue between media production and consumption researchers. It will interest scholars in media industry studies and across media studies more broadly, with particular appeal to those concerned about the current and future reach of media industries into our lives. *The Earth and Its Inhabitants: Austria-Hungary, Germany, Belgium, and the Netherlands* Elisée Reclus, 1876 *Musical Standard*, 1922

*China Court Cases on Intellectual Property Rights* ??, 2011-01-01. This book presents in extraordinary detail sixteen landmark cases that profoundly affect the protection of intellectual property rights in China. Written by six prominent Chinese legal scholars and jurists including judges who themselves participated in these decisions, each case is fully described and analysed: the parties and their representatives, the basic facts, the facts ascertained by the court, the evidence presented by plaintiffs and defendants, the judges' opinions with their arguments and reasoning, the unanimous conclusions, and the judgment along with a wealth of deeply informed comment. Among the questions raised by these cases are the following: Is a website within the definition of a work in copyright law and thus protected? How should the acts of uploading and downloading of works from the Internet be classified? Can the concept of torts be applied in the Internet context? What is the legal liability of an Internet service provider? How is a defendant's unreasonable conduct to be determined? Who is responsible for the determination of artistic value, e.g. of clothing designs? What evidence must be presented to serve as sufficient proof that a domain name is a party's own creation? In what a manner should packaging and decoration be regarded? How should the author in copyright conflict cases be identified? How should an unauthorized web link be judged? When do separate components assembled to create a product enjoy copyright protection? How should damages be determined? An introductory essay provides a detailed overview of the characteristics of China's intellectual property law as it continues to develop, with attention to such factors as the specific laws enacted, the various courts and tribunals to which IP cases are assigned, the progress of a case starting from filing to winding up, regulations, reform programs, and rules of evidence. The editor puts forward his own proposals, particularly in light of the so-called interfering factors on reform of civil trial style in intellectual property cases. It is difficult to overstate the value of this book to anyone involved in business dealings in China. With its authoritative expertise, abundant detail, and thorough elucidation of the salient features of developing IP law and practice in China, it will serve interested parties for years to come.
