Baum,Philip B. K. Potter,2015-04-27 Why do some democracies reflect their citizens foreign policy preferences better than others What roles do the media political parties and the electoral system play in a democracy s decision to join or avoid a war War and Democratic Constraint shows that the key to how a government determines foreign policy rests on the transmission and availability of information Citizens successfully hold their democratic governments accountable and a distinctive foreign policy emerges when two vital institutions a diverse and independent political opposition and a robust media are present to make timely information accessible Matthew Baum and Philip Potter demonstrate that there must first be a politically potent opposition that can blow the whistle when a leader missteps This counteracts leaders incentives to obscure and misrepresent Second healthy media institutions must be in place and widely accessible in order to relay information from whistle blowers to the public Baum and Potter explore this communication mechanism during three different phases of international conflicts when states initiate wars when they respond to challenges from other states or when they join preexisting groups of actors engaged in conflicts Examining recent wars including those in Afghanistan and Iraq War and Democratic Constraint links domestic politics and mass media to international relations in a brand new way Rupert Murdoch Jerome Tuccille,2003 This is a reprint of a previously published book It deals with the life of Rupert Murdoch the media mogul TV Guide ,2004 *Phonology in the Bilingual and Bidialectal Lexicon* Isabelle Darcy,Annie Tremblay,Miquel Simonet,2017-07-06 A conversation between two people can only take place if the words intended by each speaker are successfully recognized Spoken word recognition is at the heart of language comprehension This automatic and smooth process remains a challenge for models of spoken word recognition Both the process of mapping the speech signal onto stored representations for words and the format of the representation themselves are subject to debate So far existing research on the nature of spoken word representations has focused mainly on native speakers The picture becomes even more complex when looking at spoken word recognition in a second language Given that most of the world s speakers know and use more than one language it is crucial to reach a more precise understanding of how bilingual and multilingual individuals encode spoken words in the mental lexicon and why spoken word recognition is more difficult in a second language than in the native language Current models of native spoken word recognition operate under two assumptions i that listeners perception of the incoming speech signal is optimal and ii that listeners lexical representations are accurate As a result lexical representations are easily activated and intended words are successfully recognized However these assumptions are compromised when applied to a later learned second language For a variety of reasons e g phonetic phonological orthographic second language users may not perceive the speech signal

optimally and they may still be refining the motor routines needed for articulation Accordingly their lexical representations may differ from those of native speakers which may in turn inhibit their selection of the intended word forms Second language users also have to solve a larger selection challenge having words in more than one language to choose from Thus for second language users the links between perception lexical representations orthography and production are all but clear Even for simultaneous bilinguals important questions remain about the specificity and interdependence of their lexical representations and the factors influencing cross language word activation This Frontiers Research Topic seeks to further our understanding of the factors that determine how multilinguals recognize and encode spoken words in the mental lexicon with a focus on the mapping between the input and lexical representations and on the quality of lexical representations

enjoy such Australian productions as *The Flying Doctors*, *Neighbours* and *Kath and Kim*. The origins, early development and later adaptations of radio and television show how Australia has gone from being a minor and rather parochial player to being a significant part of the international scene. *The A to Z of Australian Radio and Television* provides essential facts and information concerning the Australian radio and television industry. This is accomplished through the use of a chronology, an introductory essay, a bibliography and hundreds of cross-referenced dictionary entries on directors, producers, writers, actors, television and radio series and television and radio stations. *APAIS 1992: Australian public affairs information service*,

BUG Australia 2005 Tim Uden, 2005. Budget travel is what BUG guides are all about: no flash hotels and fancy banquets, just the most comprehensive information on backpackers' hostels and living it up without blowing the budget. *Australian National Bibliography: 1992*. National Library of Australia, 1988. **Digital Inclusion** Simeon Yates, Elinor Carmi, 2024-03-28.

This collection presents policy and research that addresses digital inequalities, access and skills from multiple international perspectives. With a special focus on the impact of the COVID-19 pandemic, the collection is based on the 2021 Digital Inclusion Policy and Research Conference with chapters from both academia and civic organizations. The COVID-19 pandemic has changed citizens' relationship with digital technologies for the foreseeable future. Many people's main channels of communication were transferred to digital services, platforms and apps. Everything went online: our families, friends, partners, health, work, news, politics, culture, arts and protesting. Yet access to digital technologies remained highly unequal. This brought digital inclusion policy and research to the fore, highlighting to policymakers and the public the hidden challenges and impacts of digital exclusion and inequalities. The cutting-edge volume offers research findings and policy case studies that explore digital inclusion from the provision of basic access to digital via education and digital literacy and on to issues of gender and technology. Case studies are drawn from varied sources including the UK, Australia, South America and Eastern Europe, providing a valuable resource in the pursuit of social equity and justice. This is an open access book. **The SAGE**

Encyclopedia of Journalism Gregory A. Borchard, 2022-02-22. Journalism permeates our lives and shapes our thoughts in ways that we have long taken for granted. Whether it is National Public Radio in the morning or the lead story on the Today show, the morning newspaper headlines up to the minute, Internet news, grocery store tabloids, Time magazine in our mailbox or the nightly news on television, journalism pervades our lives. The Encyclopedia of Journalism covers all significant dimensions of journalism such as print, broadcast and Internet journalism, U.S. and international perspectives and history, technology, legal issues and court cases, ownership and economics. The encyclopedia will consist of approximately 500 signed entries from scholars, experts and journalists under the direction of lead editor Gregory Borchard of University of Nevada Las Vegas. *Mobile Multimedia Processing* Xiaoyi Jiang, Matthew Y. Ma, Chang Wen Chen, 2010-03-25. The portable device and mobile phone market has witnessed rapid growth in the last few years with the emergence of several revolutionary products such as mobile TV, converging iPhone and digital cameras that combine music, phone and video functionalities into one device.

The proliferation of this market has further benefited from the competition in software and applications for smart phones such as Google's Android operating system and Apple's iPhone App Store stimulating tens of thousands of mobile applications that are made available by individual and enterprise developers. Whereas the mobile device has become ubiquitous in people's daily life not only as a cellular phone but also as a media player, a mobile computing device and a personal assistant, it is particularly important to address challenges timely in applying advanced pattern recognition, signal information and multimedia processing techniques and new emerging networking technologies to such mobile systems. The primary objective of this book is to foster interdisciplinary discussions and research in mobile multimedia processing techniques, applications and systems as well as to provide stimulus to researchers on pushing the frontier of emerging new technologies and applications. One attempt on such discussions was the organization of the First International Workshop of Mobile Multimedia Processing WMMP 2008 held in Tampa, Florida, USA on December 7, 2008. About 30 papers were submitted from 10 countries across the USA, Asia and Europe.
