Paperbound Books in Print ,1991 Perspectives ,2002 Royalists, Radicals, and les Misérables Eric Martone, 2014-10-02 The year of 1832 marked a turning point in France as the country struggled to find its way in the wake of the French Revolution Following the Revolution of 1830 Legitimists supporters of the recently ousted Bourbon dynasty's claim to the throne continued to plot against King Louis Philippe and his July Monarchy In early 1832 after failing to launch a coup in Southern France Legitimists plotted an unsuccessful uprising in the Vendée a region in Western France that had supported the royalist cause during the French Revolution The Duchesse de Berry led the rebellion in the hopes of placing her son the Bourbon heir on the French throne The revolt marked the last attempt by the Bourbons to retake the throne by force and helped solidify the end of the Bourbon dynasty During the cholera outbreak which also spread throughout France in 1832 lower income areas suffered higher losses to the disease for they were more likely to have contaminated water supplies The lower classes spread rumors that the outbreak was an elitist plot to subdue the masses and the epidemic exacerbated class tensions Meanwhile conditions in France continued to be characterized by violence during the early 1830s

as Louis Philippe attempted to establish his regime's authority. The most significant of these uprisings was the republican dominated June Revolution of 1832. Victor Hugo and other contemporaries perceived the barricades of June as natural extensions of the cholera epidemic or the political continuation of a biological crisis. The sad fate of the uprising however prompted republicans to regroup and develop new strategies for success. As a whole then 1832 helped solidify the end of the Bourbon monarchy and class identities and was a crucial moment in the reorganization and growing solidification of French republicanism that paved the way for the Revolution of 1848. This edited collection examines these three pivotal events in French history in 1832 a royal Legitimist uprising led by the Duchesse de Berry the cholera epidemic and the June Revolution featured in the climax of Hugo's novel *Les Misérables* within the context of the legacy of the French Revolution. While the events of 1832 are significant they have been relatively ignored because scholars have been distracted by the Revolutions of 1830 and 1848. This collection is the first piece of scholarship to examine these three events in an interconnected pattern to better examine France as it transitioned from a monarchy to a republic. As a result this collection will be of value to both historians and academics studying diverse subfields within French and European studies.

The Tao of Cosmos Zhen G. Ma, 2024-07-23. Connects the philosophy of the I Ching with key recent advances in cosmology such as the Big Bang theory, Roger Penrose's cyclic conformal cosmology and his and Stuart Hameroff's cosmic quantum brain dynamics. Explains the Taoist cosmology of Heaven, Humanity, Oneness in the context of Teilhard de Chardin's evolutionism, Thomas Berry's cosmogenetic trinity and Brian Swimme's 12 cosmological powers. Examines the holographic unity of Heaven, Earth and Humankind at microcosmic, mesocosmic and macrocosmic scales. Is the universe inert and empty or is it in some way responsive to consciousness? Breathing new life into a question that has perplexed philosophers since ancient times and scientists for the last century, physicist Zhen G. Ma, Ph.D. offers a quantitative theory of everything that beautifully integrates ancient I Ching philosophy, Eastern Taoism, modern cosmology and the quantum brain dynamics of consciousness. Sharing insights from his years of research on space physics and black hole spacetime complemented by studies in quantum brain dynamics and cosmological powers with Brian Swimme at the California Institute of Integral Studies, Ma explains how his integrated theory draws primarily on two key paradigms in the philosophy of cosmology and consciousness: Swimme's cosmic creation story of the universe as a green dragon and Roger Penrose and Stuart Hameroff's cosmic consciousness. Extending these theories further, Ma shows how they harmonize not only with the ancient Eastern philosophy of the oneness of heaven and humanity but also with a holographic cosmic principle that connects the quantum plasma brain with the universe and earth with heaven. He then looks at this holographic unity in the cyclic process of birth, growth, decay and death and shows how it resonates with Einstein-Friedmann's cosmological dynamics and Hawking-Penrose's quantum gravity model. Demonstrating a quantitative paradigm of everything, Ma shows how humanity is inextricably and holistically blended into the cosmic fabric of the universe.
