

Alfa Laval PANX range of decanters for crude palm oil

High-performance three-phase decanters centrifuges

Applications

Alfa Laval developed the PANX range of three-phase decanter centrifuges especially for processing crude palm oil, focusing on efficient, reliable separation of liquid, dry solids (cake) and oil for maximum oil recovery with minimum oil losses. The PANX range therefore includes decanters suitable for every size of palm oil mill, from 30 to approximately 90 tons of fresh fruit bunches (FFB) per hour, and for a variety of crude palm oil applications. These include:

- Combined clarification and purification of pressed oil as part of the Alfa Laval D3 PRO all-in-one process (no need for settling tanks and dilution water). This provides high oil recovery with low water consumption and effluent level.
- Sludge treatment after separation of diluted palm oil in settling tanks, using the three-phase units as an alternative to a nozzle separator. The decanter efficiently separates the slurry into oil, water and solid cake phases.
- Oil recovery from empty fruit bunch liquor (EFBL) immediately after pressing. The high-quality palm oil recovered after separation and removal of impurities with a decanter can be mixed with the freshly pressed oil.

Benefits

The design of Alfa Laval PANX decanter centrifuges provides multiple operating benefits:

- More cost-effective separation of palm oil
- Up to 30% savings on power consumption as a result of an innovative liquid outlet design
- Improved solids dryness, ensuring lower costs for drying or disposal
- Increased capacity within the same space (or less), for a smaller investment.

Design

The Alfa Laval PANX decanter centrifuge range is designed to ensure easy access, good reliability and low maintenance costs. The rotating assembly is held at both ends by bearings mounted on a welded box beam frame. It is enclosed in a casing comprising a semi-cylindrical hood and a bottom section welded to the frame. The cover is hinged to ensure easy access. The bottom section incorporates the solids discharge funnel and the liquid outlet.
