Financial Statements Professor Carsten Berkau, 2020-09-14 This textbook covers the syllabus of Financial Accounting following IFRSs. The teaching approach is to explain financial statements and their items by more than 60 international case studies which include all relevant Bookkeeping entries and accounts. Furthermore, you can download more than 300 exam tasks and solutions online accessible through QR codes in the text. The books help you to prepare for your Accounting exam at the university. All chapters outline their learning objectives, provide an overview, explain the contents with referring to relevant IAS/IFRS standards and their paragraphs, introduce case studies by a data sheet box and explain the Accounting work completely by Bookkeeping entries and accounts. The text contains How it is Done sections to give you short and precise guidance for your own calculations. Every chapter ends with a summary, working definitions for newly introduced technical Accounting terms and test questions with solutions for checking your comprehension. *Financial Accounting* Jerry J. Weygandt, Paul D. Kimmel, Donald E. Kieso, 2010-05-25 Focus on GAAP and IFRS. This title makes extensive use of international companies, allowing the reader to get a global understanding of financial accounting. Financial Reporting under IFRS Wolfgang Dick, Franck Missonier-Piera, 2010-10-11 The International Financial Reporting Standards are quite different from other sets of accounting standards and are fundamentally different from US GAAP in that they are based on principles and not on detailed rules. Financial Reporting under IFRS: A topic-based approach offers a global perspective on IFRS by presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements through examples, activities, questions, and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links, and the accounting mechanisms used to prepare them. Section two deals with the identification, evaluation, and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book, special topics are covered, including Derivatives and Hedge accounting, IAS 39 Business Combination, IFRS 3 and Operating Segments, IFRS 8 Financial Reporting under IFRS is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees, and governments, will benefit from its concise, topic-based approach.
