Did I Ever Tell You about the Whale? William L. Nolte, 2008-11-01 Foreword by James W. Billbro Technology maturity: What is it and why is it important? For more than ten years the Government Accountability Office (GAO) has criticized federal agencies for a history of cost and schedule overruns on a significant portion of their procurement programs. GAO has repeatedly reported that the use of immature technologies in programs is a primary cause for these overruns. In spite of these repeated reports, the problems in government procurement have not improved. In fact, recent reports indicate that the problems are getting worse. One cause of this worsening situation might be that while GAO identified lack of technology maturity as a problem, they did not tell how to measure technology maturity or conversely its lack. This groundbreaking work attempts to fill this gap by examining the current state of technology maturity measurement, pointing out strengths and weaknesses of available measures, and proposing a complete technology maturity assessment as a potential solution. The book also includes a discussion of risk during technology development.

Whales of the Southern Ocean

Yuri Mikhalev, 2020-01-28 Based on actual data of Soviet whaling and reliable methodologies that existed at the time when this monograph was written, it examines the distribution and migration patterns of whales of the Southern Ocean. It defines distinct populations on the basis of phenes as well as whale breeding zones which are located in the adjacent to the Southern Ocean waters at lower latitudes. The book records the presence of a new species of killer whale in the Southern Ocean, *Orcinus nana*. Prenatal growth patterns, pregnancy and lactation duration, mean sizes of new born whales are determined. Methods for the graphic recording of registering structures are described, and an original method for their decoding is proposed to determine animal age. The age of sexual and physical maturity, life expectancy is determined. Earlier unknown pair formations on the lower jaw of baleen whales and sperm whales are described together with their macro histological and electronic microscopic structure. The impact of the extermination of whales on the Southern Ocean ecosystem is examined. Recommendations for control of the current state of whale populations are given, and perspectives of whale population recovery are estimated. Regions that could be used as testing areas for whale registration method are defined. The book is intended for biologist, cytologists, ecologists, and other specialists interested in cetaceans and for biology students.

The Biology and Conservation of Animal Populations John A. Vucetich, 2024-07-02 This work is the first textbook on population biology grounded in conservation of wildlife, giving students an approachable and motivational context for equation-heavy fundamentals.
