**Capricious** Gabrielle Prendergast, 2014-04-01 Ella's grade eleven year was a disaster Audacious but as summer approaches things are looking up She's back together with her brooding boyfriend Samir although they both want to keep that a secret She's also best buddies with David and still not entirely sure about making him boyfriend number two Though part of her wants to conform to high school norms the temptation to be radical is just too great Managing two secret boyfriends proves harder than Ella expected especially when Samir and David face separate family crises and Ella finds herself at the center of an emotional maelstrom Someone will get hurt Someone risks losing true love Someone might finally learn that self-serving actions can have public consequences And that someone is Ella

**Failure** Colin Feltham, 2014-09-03 Failure success's ugly sister is inevitable cognitively biologically and morally We all make mistakes we all die and we all get it wrong A chain of flaws can be traced through all phenomena natural and human We see impending and actual failures in individual lives in marriages careers in religion education psychotherapy business nations and in entire civilizations And there are chronic and imperceptible failures in everyday domains that most of the time we barely notice often until it is too late Colin Feltham exposes what constitutes failure across a number of domains He takes guidance from the work of such diverse philosophers and thinkers as Diogenes Epictetus Augustine Schopenhauer Kierkegaard Heidegger Sartre Camus Cioran and Ricoeur while also drawing on the insights of artists and writers such as van Gogh Arthur Miller Philip Larkin Samuel Beckett Charles Bukowski and Philip Roth Precursors and partial synonyms for failure can be seen in the concepts of hamartia sin fallenness non-being false consciousness and anthropathology Philosophy can help us but is itself in its reliance on language and logic subject to inherent flaws and failures It is the very pervasiveness yet common denial of failure which makes it a compelling topic that cries out for honest analysis We live in a time when the cliché of failed Marxism may be segueing frighteningly for some into the failure of selfish capitalism in a time of geopolitical uncertainty and failure to

address the dire need for agreement and action on climate change But many of us are also painfully aware of our own shortcomings our own weakness of will and lack of authenticity Trying to identify where the lines may be drawn between individual responsibility social policy and historical and biological dark forces is a key challenge in this fascinating book

**Social Morphogenesis** Margaret S. Archer, 2013-02-20 The rate of social change has speeded up in the last three decades but how do we explain this This volume ventures what the generative mechanism is that produces such rapid change and discusses how this differs from late Modernity Contributors examine if an intensification of morphogenesis positive feedback that results in a change in social form and a corresponding reduction in morphostasis negative feedback that restores or reproduces the form of the social order best captures the process involved This volume resists proclaiming a new social formation as so many books written by empiricists have done by extrapolating from empirical data Until we can convincingly demonstrate that a new generative mechanism is at work it is premature to argue what accounts for the global changes that are taking place and where they will lead More concisely we seek to answer the question whether or not current social change can be regarded as social morphogenesis Only then in the next volumes will the same team of authors be able to remove the question mark
