Security, Governance, and State Fragility in South Africa Edward L. Mienie, 2020-03-06 Do existing measures of state fragility measure fragility accurately Based on commonly used fragility measures South Africa SA is classified as a relatively stable state yet rising violent crime high unemployment endemic poverty eroding public trust identity group based preferential treatment policies and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility Based on a comprehensive view of security this study examines the extent to which measures of political legitimacy and good governance effectiveness in the security system especially with respect to the police system and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility Using a mixed methods approach based on quantitative secondary data analysis and semi structured interviews with government officials security practitioners and leading experts in the field this study finds that the combination of colonization apartheid liberation struggle transition from autocracy to democracy high levels of direct and structural violence stagnating social political and economic developments make South Africa a latently fragile state Conceptually the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility Practically this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility

Security Governance, Policing, and Local Capacity Jan Froestad,Clifford Shearing,2012-12-13 The security governance of South Africa has faced immense challenges amid post apartheid constitutional and political transformations In many cases policing and governmental organizations have failed to provide security and other services to the poorest inhabitants Security Governance Policing and Local Capacity explores an experiment that took place in Zwelethemba located in South Africa s Western Cape Province to establish legitimate and effective nonstate security governance within poor urban settlements There has been and continues to be much reticence to endorsing private forms of security governance that operate outside of state institutions within local communities Those initiatives have often led to situations where force is used illegally and punishment is dispensed arbitrarily and brutally This book explores the extent to which this model of mobilizing local knowledge and capacity was able to effectively achieve justice democracy accountability and development in this region Whenever possible the book includes raw data and a thorough analysis of existing information on security governance Examining this case and its outcome the authors provide a theoretical analysis of the model used and present a series of design principles for future applications in local security governance The book concludes that poor communities are a significant source of untapped resources that can under certain conditions be mobilized to significantly enhance safety This volume is an important examination of experimental models and a presentation of new groundbreaking theory on engaging the local community in solving security governance problems
