European Regional Policy and Development María del Carmen Sánchez-Carreira, Paulo Jorge Reis Mourão, Bruno Blanco-Varela, 2023-07-18 The shortcomings of traditional regional policies led to a major policy. Thus regions have become more active in the design and implementation of policies following a bottom up approach and involving the participation of the local community in strategic planning as opposed to the traditional top down method. This book addresses regional development theories and policies with a special focus on forgotten places and raises emerging questions about recent theoretical advances as well as trends and challenges in the field. It examines two main and related issues: the crucial role of regional actors for development and the role of Forgotten Spaces. It emphasizes the spatial territorial approaches from different theoretical perspectives underlining place based approaches and compares the experiences of both successful and failed cases attempting to identify lessons and policy recommendations as well as adding empirical evidence to this field. The different cases presented which focus on Forgotten Spaces allow the reader to assess the role of different actors for regional development as well as some sectoral approaches. While there is a clear focus on European countries with different geographical institutional and sociocultural characteristics the book also examines good and bad examples of regional development and policies related to forgotten places from different regions worldwide including developed and developing countries. The book benefits from contributions from over 20 authors from different nationalities and a rich diversity of case studies approaches and methods of discussion. The authors discuss practical examples and more complex theoretical approaches involving techniques of spatial analysis spatial econometrics social networks content analysis as well as regional planning techniques. The book will appeal to an interdisciplinary audience and will provide academicians politicians and policy designers with original and detailed analyses.

The Grapes of Conquest Julia Ornelas-Higdon, 2023-11 Honorable Mention for the 2024 OAH Frederick Jackson Turner Award California's wine country conjures images of pastoral vineyards and cellars lined with oak barrels. As a mainstay of the state's economy California wines occupy the popular imagination like never before and drive tourism in famous viticultural regions across the state. Scholars know remarkably little however about the history of the wine industry and the diverse groups who built it. In fact contemporary stereotypes belie how the state's commercial wine industry was born amid social turmoil and racialized violence in eighteenth and nineteenth century California. In *The Grapes of Conquest* Julia Ornelas Higdon addresses these gaps in the historical narrative and popular imagination. Beginning with the industry's inception at the California missions Ornelas Higdon examines the evolution of wine growing across three distinct political regimes Spanish Mexican and American through the industry's demise after Prohibition. This interethnic study of race and labor in California examines how California Natives Mexican Californios Chinese immigrants and Euro Americans came together to build the industry. Ornelas Higdon identifies the birth of the wine industry as a significant missing piece of California history one that reshapes scholars understandings of how conquest

played out how race and citizenship were constructed and how agribusiness emerged across the region The Grapes of Conquest unearths the working class multiracial roots of the California wine industry challenging its contemporary identity as the purview of elite populations Old Santa Fe Ralph Emerson Twitchell,1914 Medical Terminology, Enhanced Edition Judi L.
