Beyond the Triple Bottom Line Francisco Szekely, Zahir Dossa, 2024-08-06 A pragmatic new business model for sustainability that outlines eight steps that range from exploring a mission to promoting innovation with case studies Many recent books make the case for businesses to become more sustainable but few explain the specifics In this book Francisco Szekely and Zahir Dossa offer a pragmatic new business model for sustainability that extends beyond the traditional framework of the triple bottom line describing eight steps that range from exploring a vision and establishing a strategy to implementing the strategy and promoting innovation Szekely and Dossa argue that businesses and organizations need to move away from the business case for sustainability toward a sustainable business model That is businesses should go beyond the usual short term focus on minimizing harm while maximizing profits Instead businesses on the path to sustainability should from the

start focus on addressing a societal need and view profitability not as an end but as a means to support the sustainable organization Szekely and Dossa explore key problems organizations face when pursuing a sustainability agenda Each chapter presents one of the eight steps describes a business dilemma for sustainability provides a theoretically grounded strategic framework offers case studies that illustrate the dilemma and summarizes key findings the case studies draw on the experiences of such companies as Tesla Motors Patagonia TOMs and Panera The book emphasizes leadership arguing that leaders who question the status quo inspire others and take risks are essential for achieving sustainable business practices

Vandall,2011-01-17 A History of Civil Litigation Political and Economic Perspectives by Frank J Vandall studies the expansion of civil liability from 1466 to 1980 and the cessation of that growth in 1980 It evaluates the creation of tort causes of action during the period of 1400 1980 Re evaluation and limitation of those developments from 1980 to the present are specifically considered The unique focus of the book is first to argue that civil justice no longer rests on historic foundations such as precedent fairness and impartiality but has shifted to power and influence Reform in the law legislative judicial and regulatory is today driven by financial interests not precedent not a neutral desire for fairness and not to make it better It uses products cases and policies for much of its argument These policies can be summarized as a shift from a balanced playing field negligence to one that favors injured consumers The strict liability foreshadowed by Judge Traynor in *Escola v Coca Cola* 1944 was not adopted until 1962 when Traynor wrote

the majority opinion in *Greenman v Yuba Power Products* for the California Supreme Court. Second, the book examines the role of persuasive non-governmental agencies such as the American Law Institute in reforming and shaping civil justice. Never has it been less true that we live under the rule of law. Congress, agencies, and the courts make the law, but they are driven by those who have a large financial stake in the outcome. Today, those with power shape the character of products liability law at every turn.
