the comparability of financial reporting especially in an IFRS environment In this context this book reviews research studies on the comparability of financial reporting at a global level as well as highlights empirical analyses that demonstrate the extent to which global comparability has been achieved and how it enhances value relevance of earnings across countries It also looks at the cross country investors perspectives by shaping the empirical analysis to provide further insights on the role of the Big Four auditing services in enhancing the comparability of earnings The book provides an original contribution to the current debate about the comparability of financial reporting under IFRS and will be useful for researchers in the field
