

ACS (American Chemical Society) Style Guidelines Quick Guide

This web guide is based on the second edition of *The ACS Style Guide: A Manual for Authors and Editors* (1997). For a more thorough discussion refer to *The ACS Style Guide* which is available at the Chemistry and Engineering Libraries (Call number QD8.5.A25 1997 Reference Section).

Citing References in the Body of a Paper

References in the body of a paper can be cited:

- *By number (italics)*
The synthesis of the compound has been described previously (*1*).
- *By superscript*
The synthesis of the compound has been described previously.¹
- *By author name and date*
The synthesis of the compound has been described previously (Johnson, 1902).

With numerical citations, references should be numbered sequentially. If a reference is repeated, do not give it another number; rather, use the original reference number.

With author name citations, use both names if a reference has two authors (Jones and Smith, 2002). If there are more than two authors, use the first name followed by et al. (Harris et al., 2001).

Creating a Bibliography

- Arrange the references in your bibliography based on the method used for in-text citations. If numerical citations were used, then arrange references at the end of the paper numerically. If author names were used, arrange alphabetically.
- All references end with a period.
- Do not leave blank lines between references.
- Journal article titles and book chapter titles are not essential, but they are considered desirable.
- If a book as a whole is used, pagination is not necessary.

Book with Author(s)

Basic Format:

Author, A. A.; Author, B. B. *Book Title (italics)*. Edition (if any); Publisher: Place of Publication, Year; Pagination.

Dill, K. A.; Bromberg, S. *Molecular Driving Forces: Statistical Thermodynamics in Chemistry and Biology*; Garland Science: New York, 2003.

Engel, R.; Cohen, J. I. *Synthesis of Carbon-Phosphorus Bonds: New Methods of Exploration*; CRC Press: Boca Raton, FL, 2004; pp 54-56.

Zumdahl, S. S. *Chemical Principles*, 4th ed.; Houghton Mifflin: Boston, MA, 2002; p 7.
