ASHER. BENJAMIN, 2025 *The Architect, Or Practical House Carpenter (1830)* Asher Benjamin, 1988 Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane s Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane s late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane s influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane s is a continuing not negated legacy in architecture

Architecture in Indianapolis James A. Glass, 2025-06-10 As the twentieth century began Indianapolis found itself at the center of a booming commercial and industrial network with new office buildings department stores theaters hotels factories places of worship and the largest electric interurban train network in the nation The population was growing as well with many new residential additions to the city planned from ornate mansions on the north side of the city to working class bungalows and apartments In *Architecture in Indianapolis 1900 1920* preservationist and architectural historian Dr James A Glass describes the varied architectural currents that shaped buildings in Indianapolis during the first two decades of the twentieth century a period when the Commercial Club of Indianapolis called the state capital the largest inland city With over 300 photographs and drawings as well as 31 maps Glass continues the exploration begun in Volume 1 of the variety of architectural styles that the city s builders drew on including Italian Renaissance Gothic Arts and Crafts Modern Tudor palace and Tudor vernacular Prairie Style and many more And like Volume 1 Volume 2 documents the loss of distinctive

architecture that has occurred throughout Indianapolis and explains why certain structures were razed Both volumes together provide the first history of architecture in the city during its first century and will serve as an indispensable reference for decades to come Along with its companion 1820 1900 Architecture in Indianapolis 1900 1920 describes the varied architecture that architects and builders in the city designed and constructed during the first two decades of the twentieth century and profusely illustrates buildings of that period providing an indispensable reference for decades to come

Design Technics Zeynep Çelik Alexander, John May, 2020-01-21 Leading scholars historicize and theorize technology's role in architectural design Although the question of technics pervades the contemporary discipline of architecture there are few critical analyses on the topic Design Technics fills this gap arguing that the technical dimension of

design has often been flattened into the broader celebratory rhetoric of innovation Bringing together leading scholars in architectural and design history the volume's contributors situate these tools on a broader epistemological and chronological canvas The essays here construct histories some panoramic and others unfolding around a specific episode of seven techniques regularly used by the designer in the architectural studio today rendering modeling scanning equipping specifying positioning and repeating Starting with observations about the epistemological changes that have unfolded in the discipline in recent decades but seeking to offer a more expansive meaning for technics the volume casts new light on concepts such as form experience and image that have played central roles in historical architectural discourses Among the questions addressed How was the concept of form immanent in practices of scanning since the late nineteenth century What was the historical relationship between rendering and experience in Enlightenment discourses How did practices of specifying reconfigure the distinction between intellectual and manual labor What kind of rationality is inherent in the designer's constant clicking of the mouse in front of her screen In addressing these and other questions this engaging and timely collection thereby proposes technics as a site for historical and philosophical reflection not only for those engaged in architectural design but also for any scholar working in the humanities today Contributors Lucia Allais Edward Eigen Orit Halpern John Harwood Matthew C Hunter and Michael Osman

The Exchange Artist Jane Kamensky, 2008-01-24 The riveting story of the country's first banking scandal in the first decades of the American republic This enthralling historical narrative of the birth of speculative capitalism in America opens in the 1790s when financial pioneer turned confidence man Andrew Dexter Jr created a pyramid scheme founded on real estate speculation and the greed of banks who freely printed the paper money he needed to finance the then tallest building in the United States the Exchange Coffee House a 153 room seven story colossus in downtown Boston The story of Dexter's rise and eventual collapse offered an object lesson to the rising young nation and presents striking parallels to the subprime mortgage meltdown and looming economic collapse of today

The Mirror of Antiquity Caroline Winterer, 2018-07-05 In *The Mirror of Antiquity* Caroline Winterer uncovers the lost world of American women's classicism during its glory days from the eighteenth through the nineteenth centuries Overturning the widely held belief that classical learning and political ideals were relevant only to men she follows the lives of four generations of American women through their diaries letters books needlework and drawings demonstrating how classicism was at the center of their experience as mothers daughters and wives Importantly she pays equal attention to women from the North and from the South and to the ways that classicism shaped the lives of black women in slavery and freedom In a strikingly innovative use of both texts and material culture Winterer exposes the neoclassical world of furnishings art and fashion created in part through networks dominated by elite women Many of these women were at the center of the national experience Here readers will find Abigail Adams teaching her children Latin and signing her letters as Portia the wife of the Roman senator Brutus the Massachusetts slave Phillis Wheatley writing poems in imitation of her

favorite books Alexander Pope's Iliad and Odyssey Dolley Madison giving advice on Greek taste and style to the U S Capitol's architect Benjamin Latrobe and the abolitionist and feminist Lydia Maria Child who showed Americans that modern slavery had its roots in the slave societies of Greece and Rome Thoroughly embedded in the major ideas and events of the time the American Revolution slavery and abolitionism the rise of a consumer society this original book is a major contribution to American cultural and intellectual history The Courthouse and the Depot Wilber W. Caldwell, 2001 Their songs insist that the arrival of the railroad and the appearance of the tiny depot often created such hope that it inspired the construction of the architectural extravaganzas that were the courthouses of the era In these buildings the distorted myth of the Old South collided head on with the equally deformed myth of the New South **Athens on the Frontier** Patrick Lee

Lucas, 2023-03-28 In 1811 architect Benjamin Henry Latrobe spurred American builders into action when he called for them to reject the corrupt Age of Dioclesian or the still more absurd and debased taste of Louis the XIV and to emulate instead the ancient temples of Greece In response people in the antebellum trans Appalachian region embraced the clean lines intricate details and stately symmetry of the Grecian style On newly built public buildings private homes and religious structures references to classical Greek architecture became the preferred ornamentation Several antebellum cities and towns adopted the moniker of Athens styling themselves as centers of culture education and sophistication As the trend grew American citizens understood the name as a link between the Grecian style and the founding principles of democracy signaling a change of taste in service to the larger American cultural ideal In *Athens on the Frontier* Patrick Lee Lucas examines the material culture of Grecian style buildings in antebellum America to help recover nineteenth century regional identities As communities worked to define their built landscape and develop a shared Western identity Lucas's study invites readers to question many of the assumptions Americans have made about divisions and cultural formation in antebellum society

Edward Shaw of Boston James F. O'Gorman, 2016-01-01 This is the first in depth study of the career of an important antebellum American architect and author It is a contribution to the history of architecture and the history of the book In the quarter century after 1830 Edward Shaw designed dozens of town houses in Boston including the landmark Adam Wallace Thaxter Jr house on Beacon Hill 1836 Shaw also published five influential books on architecture and structural materials one of them reprinted in several editions to 1900 Research in Boston archives has unearthed building records and drawings for unbuilt Shaw designs Also describes the design and contents of Shaw's published works and traces their distribution across the country from Maine to Oregon Illus **Architecture in the United States, 1800-1850** William Barksdale

Maynard, 2002-01-01 This study traces the development of American architecture from the age of Jefferson to the antebellum era providing a survey of this important period W Barksdale Maynard overturns the long accepted notions that the chief theme of early 19th century American architecture was a patriotic desire to escape from European influence and that competing styles chiefly reflected the American struggle for cultural uniqueness Instead deep and consistent aesthetic ties

especially with England shaped American architecture and house designs Maynard shows that the Greek Revival in particular was an international phenomenon with American achievements inspired by British example and with taste taking precedence over patriotism
