The Arms Dynamic in World Politics Barry Buzan, Eric Herring, 1998 Presented as a successor to the Cold War era book *An Introduction to Strategic Studies* this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR

Gray,2014-06-26 Strategy and Defence Planning Meeting the Challenge of Uncertainty explores and examines why and how security communities prepare purposefully for their future defence The author explains that defence planning is the product of interplay among political process historical experience and the logic of strategy The theory of strategy best reveals both the nature and the working of defence planning Political ends strategic ways and military means all fed by reigning if not always recognized assumptions organize the subject well with a template that can serve any time place and circumstance The book is designed to help understanding of what can appear to be a forbiddingly complex as well as technical subject A good part of the problem for officials charged with defence planning duties is expressed in the second part of the book s title The real difficulty which rarely is admitted by those tasked with defence planning duty is that defence planning can only be guesswork But because defence preparation is always expensive not untypically is politically unpopular yet obviously can be supremely important claims to knowledge about the truly unknowable persist In truth we cannot do defence planning competently because our ignorance of the future precludes understanding of what our society will be shown by future events to need The challenge faced by the author was to identify ways in which our problems with the inability to know the future in any detail in advance the laws of nature in other words may best be met and mitigated Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning that hopefully will prove good enough **Technology and Security** Brian Rappert,2007-10-11 This book takes forward the existing state of academic understanding where security and technology intersect It assesses the challenges posed by emerging scientific and technological developments for security while understanding how perceptions of security threats are themselves formed in relation to conceptions of science and technology Contemporary Security Studies Alan Collins,2022 With unrivalled coverage of a wide range of issues from terrorism nuclear deterrence and the weapons trade to environmental security transnational crime and cyber security Contemporary Security Studies is the definitive cutting edge introduction to security studies Bringing together contributions from leading scholars it provides a student friendly guide to traditional and critical theoretical approaches as well as the most important contemporary issues that dominate the modern security field Whether you are exploring how politicians portrayed the Covid19 pandemic as a security issue or the role that popular culture plays in promoting peace a broad variety of real world case studies and examples throughout the text encourage you to question your preconceptions of security studies and to critically evaluate key approaches and ideas in the subject New to this Edition A new Chapter 13 on popular culture introduces you to this innovative approach to security studies exploring the role that it plays in shaping and understanding security related processes A revised Chapter 12 on securitization theory traces its emergence and evolution as a framework for analysis covering everything you need to know about its main concepts and criticisms Chapter 27 on

The Logic of American Nuclear Strategy Matthew Kroenig,2018 For decades the reigning scholarly wisdom about nuclear weapons policy has been that the United States only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack So long as the US or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold According to this theory possessing more weapons than necessary for a second strike capability is illogical This argument is reasonable but when compared to the empirical record it raises an important puzzle Empirically we see that the United States has always maintained a nuclear posture that is much more robust than a mere second strike capability In The Logic of American Nuclear Strategy Matthew Kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state s national security goals In fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war provides it with bargaining leverage and ultimately enhances nuclear deterrence This book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages In so doing it helps resolve one of the most intractable puzzles in international security studies Buoyed by an innovative thesis and a vast array of historical and quantitative evidence The Logic of American Nuclear Strategy will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence

Kenyon, John Simpson, 2013-10-18 This collection of papers rigorously examines the current place of deterrence in international security relations delivering the best of contemporary thinking This is a special issue of the leading journal Contemporary Security Policy It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in

the second half of the twentieth century It has been replaced by a new global security environment in which the central role of deterrence both nuclear and otherwise appears to have diminished The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies
