 25 x 10 75 inches This manual is a must have for any owner of a 1950 through 1969 motorcycle scooter or moped equipped
 with a Wipac electrical system Wipac issued two ring bound versions of this manual The first was titled Number 3 Manual
 and the second Motorcycle Scooter Manual but unfortunately the publication dates of the individual pages were not
 identified However based on the contents we can estimate that they were published in 1964 and 1969 approximately The
 later manual contains considerably more information plus numerous updates to the data in the earlier manual Unfortunately
 some of the information from the earlier manual was also omitted from the later manual as it was probably considered to be
 outdated However as that outdated information is of significant interest to today s owners and restorers we have combined
 the entire data from both manuals into a single publication Please note that wherever the earlier data had been updated we
 have only included the latest update in order to prevent duplication of information This combination manual includes
 alternator and generator testing and servicing instructions spare parts illustrations and part numbers plus Technical Data
 Sheets and Service Bulletins that provide additional information due to model updates and or electronic equipment
 modifications It also includes wiring diagrams by individual model type including A J S Ariel B S A Dayton Dunkley Excelsior
 Francis Barnett James Matchless Norton Piatti Raleigh mopeds and Triumph The entire content of this publication is devoted
 to the operation testing servicing maintenance overhaul and adjustment of all the major Wipac electrical components utilized
 by the various manufacturers listed above Out of print and unavailable for many years these manuals are extremely difficult
 to find on the secondary market and we are pleased to be able to offer this combined reproduction as a service to all owners
