BOOK JACKET Preservation Education Barry L. Stiefel, Jeremy C. Wells, 2014-09-02 Over the past twenty years there

has been a fundamental shift in the institutional organization of historic preservation education Historic preservation is the most recent arrival in the collection of built environment disciplines and therefore lacks the pedagogical depth and breadth found in allied endeavors such as architecture and planning As the first degree programs in preservation only date to the 1970s and the first doctoral programs to the 1990s new faculty are confronted with pedagogical challenges that are unique to this relatively nascent field Based on a conference that included educators from around the world Barry L Stiefel and Jeremy C Wells now present a collection that seeks to address fundamental issues of preservation pedagogy outcome based education and assessment and global issues of authenticity and significance in historic preservation The editors argue that the subject of the analysis has shifted from What is the best way to fix a historic building to What are the best ways for teaching people how to preserve historic properties and why according to the various standards that have been established This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines

How Drawings Work Susan Piedmont-Palladino, 2018-12-17 *How Drawings Work* cheekily explains that what architects make is information that enables other people to make buildings That information comes in a variety of forms drawings by hand and computer models both physical and virtual and words as needed The book reflects in witty prose on the nature of architectural drawings as tools of communication pulling from a diverse and eclectic landscape of theories from grammar functional linguistics philosophy art criticism science fiction popular culture and of course architecture to propose a new way to think about architectural communication

Mapping the Global Architect of Alterity Michael Jenson, 2014-03-21 Due to globalization cultural spaces are now developing with no tangible connection to geographical place The territorial logic traditionally used to underpin architecture and envision our built environment is being radically altered forcing the adoption of a new method of conceptualizing space geography and what constitutes architectural practice Construction techniques design sensibilities and cultural identities are being transformed as technology transports us to places that were previously unreachable The resultant globalized architect must become more than just an artful visionary but also a master of the art of the political nudge willing to act within multiple mediums and at the simultaneous scales of a chaotic new world disorder Though fearless they must also be responsible inherently understanding the necessity to align bold visions with the mundane details of the everyday in ways that are culturally flexible and accepting of change The potential for what must be considered the legitimate practice of the architect must move from a purely material venue to one more directly engaged in the chaos of the larger economic political and social spheres of a globalizing world The issues and possible interactions with globalization contained in this text exemplify ways that architecture is transforming into a more flexible and fluid interdisciplinary version of its traditional self in order to rise to challenges of this new international terrain A theme runs throughout in the form of a call that architects must conceptually re construct their frames of reference to better align with the demands of a rapidly globalizing world **Forever Practice**

Poma, 2013-11-04 *The Developing Professional Practice* series provides a thoroughly comprehensive and cutting edge guide to developing the necessary knowledge skills and understanding for teaching within the 0-7, 7-14 or 14-19 age ranges Each of the three titles offers a genuinely accessible and engaging introduction to a wide range of professional practice supporting the education of babies to young adults Discussion of current developments in theory policy and research is combined with guidance on the practicalities of working with each age group Numerous examples of real practice are included throughout along with a range of additional features to help promote understanding **The Material Imagination** Matthew Mindrup, 2016-03-03 In recent years architectural discourse has witnessed a renewed interest in materiality under the guise of such familiar tropes as material honesty form finding or digital materiality Motivated in part by the development of new

materials and an increasing integration of designers in fabricating architecture a proliferation of recent publications from both practice and academia explore the pragmatics of materiality and its role as a protagonist of architectural form Yet as the ethos of material pragmatism gains more popularity theorizations about the poetic imagination of architecture continue to recede Compared to an emphasis on the design of visual form in architectural practice the material imagination is employed when the architect thinks matter dreams in it lives in it or in other words materializes the imaginary As an alternative to a formal approach in architectural design this book challenges readers to rethink the reverie of materials in architecture through an examination of historical precedent architectural practice literary sources philosophical analyses and everyday experience Focusing on matter as the premise of an architect's imagination each chapter identifies and graphically illustrates how material imagination defines the conceptual premises for making architecture **Architecture** ,1995
