

An aerial photograph of a dense green forest is shown. Overlaid on the forest is a complex, glowing blue spider web that spans across the entire image. The web consists of numerous concentric and radial threads, creating a dense, interconnected pattern. The text "THE AGE OF SUSTAINABLE DEVELOPMENT" is superimposed in the center of the image, in a bold, white, sans-serif font. The text is arranged in three lines: "THE AGE OF" on the top line, "SUSTAINABLE" on the middle line, and "DEVELOPMENT" on the bottom line. The text is slightly transparent, allowing the blue web and green forest to be visible behind it.

The Age Of Sustainable Development:

The Age of Sustainable Development Jeffrey D. Sachs, 2015-03-10 Jeffrey D Sachs has shown himself to be one of the world's most perceptive and original analysts of global development in his groundbreaking books including *The End of Poverty* and *Common Wealth Economics for a Crowded Planet*. Now in this major new work he presents a compelling and practical framework for how global citizens can address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation and political economic injustice. Sachs outlines the holistic way forward: sustainable development. This provocative work offers readers, students, activists, environmentalists and policy makers the tools, metrics and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary general on the Millennium Development Goals and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and a clarion call for all who care about our planet and global justice.

The Age of Sustainable Development Jeffrey Sachs, Ban Ki-Moon, 2015 *Literacy for Sustainable Development in the Age of Information* Naz Rassool, 1999-01-01

This text discusses the complexities that surround literacy in the modern world. It examines prevailing definitions and views of literacy and evaluates these against the technological skills and knowledge demands of the information society. Within a world increasingly concerned about sustainable development, the book highlights the importance of multiliteracies and adequate levels of communicative competence in facilitating effective participation in the democratic process.

Fostering Sustainable Development in the Age of Technologies Rohit Sharma, Anjali Shishodia, Ashish Gupta, 2023-12-13 *Fostering Sustainable Development in the Age of Technologies* highlights the interplay between various disruptive technologies such as Artificial Intelligence, Autonomous robots, Big Data Analytics, Blockchain, Cloud Computing and Digital Twins and holistic sustainable development.

Sustainable Urban Development in the Age of Climate Change Ali Cheshmehzangi, Ayotunde Dawodu, 2018-09-28 This book considers the impact of climate change on cities, advocating that people are the panacea and antidote to mitigating climate change by enhancing their involvement in achieving sustainable development Goals (SDGs). This leads to the development of an SDG best practice participation template which is supported by an extensive checklist of the 'whats' and 'hows' in participatory processes. Using case studies, extensive literature reviews and meta-analysis to make a case for a people-centric and integrated approach to sustainable urban development, it examines the role of governance in climate change, focusing on decision-making processes, policies and regulations, as well as focusing on the significance of a people-oriented approach on climate change and cities. Through an extensive global outlook, this book highlights bottom-up methods of implementing and achieving sustainable urban development in the age of climate change. These highlights should help to develop new mindsets, new strategies, new directions and new policies through which we can

see a more sustainable approach to urbanisation and urban development globally which can start equipping future generations with the tools for them to help their future generations

Global Law of Sustainable Development Halil Göksan, 2024-12-14 This book discusses the emergence of a new concept of law at the global level in the field of sustainable development It examines the four decade long evolution of the concept of sustainable development from the Stockholm Conference of 1972 until the adoption of the Sustainable Development Goals in 2015 It brings forward a step by step guide for exploring the law like quality of global norms from a legal positivist and legal pluralist perspective

The Dilemma of Sustainability in the Age of Globalization Mohamed El-Kamel Bakari, 2017-09-05 The Dilemma of Sustainability in the Age of Globalization A Quest for a Paradigm of Development offers an exhaustive overview of the different political social economic and cultural circumstances that paved the way for the inception of sustainable development It particularly traces the evolution of this project in an unpropitious context of neo liberal capitalism and globalization By means of an in depth critical comparative analysis of the two phenomena of sustainable development and globalization this book highlights aspects of both their divergence and convergence on issues such as development man nature relationship and society This distinctive approach pinpoints the theoretical and factual aspects of clash and affinity between globalization and sustainability and spotlights some potential harmonization between the two on different levels On the whole this book covers a few gaps in the contemporary literature that heightened the need for analysis of the viability of implementing the project of sustainable development in a context of neoliberal capitalism Given the highly interdisciplinary nature of its topic a holistic approach is utilized throughout this book integrating historical literary economic political and scientific material The first part of this book is largely based on a critical comparative analysis of the two vying paradigms of development by means of a thorough juxtaposition of their theoretical and ideological underpinnings and backed up by lucid examples statistics and case studies In later sections this book provides an analysis and discussion of both the extrinsic and intrinsic obstacles to promoting sustainability in the current socio economic paradigm of development and closes by offering glimpses of hope for the future of humankind by underlining the potential of new initiatives to revive sustainable development in the 21st century

The Law of Energy for Sustainable Development IUCN Academy of Environmental Law. Colloquium, 2005 The research focus for the IUCN Academy of Environmental Law in 2003 was a timely and challenging one entitled The Law of Energy for Sustainable Development As contemporary world politics demonstrates energy resources and generation are crucial issues facing the international community As research on energy law at the international regional and national level is in its infancy the insights provided by the contributors to this 2005 volume are a significant addition to the field

An Agenda for Sustainable Development Research Walter Leal Filho, Amanda Lange Salvia, Claudio Ruy Portela de Vasconcelos, 2024-09-20 This book involves establishing a set of priorities and a roadmap that can guide scholarly and practical efforts towards sustainability goals It encourages collaboration across disciplines to address complex sustainability issues that span social

economic and environmental domains It also supports the development of robust methodologies for conducting research including quantitative qualitative and mixed methods approaches But despite the importance of and the need for an agenda for sustainable development research many efforts are isolated and thematically disconnected Also it is difficult to find information on how sustainability research is being undertaken and on the wide range of methods being used Against this backdrop and in order to facilitate a broad discussion on the contribution of sustainable development research this book is being produced The book gathers inputs from universities and research organisations working on matters related to sustainable development research in a variety of contexts It also provides a platform for the dissemination of information on the latest initiatives paving the way for technology transfer and networking Furthermore the book intends to provide a fertile basis upon which universities research centres and practitioners may cooperate more closely in this key area Last but not least a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects which aim to show how sustainability research may be implementing across a range of disciplines Thanks to its scope and interdisciplinarity this books makes an excellent reading to everyone interested on sustainability research
