The Ascent Of Man Henry Drummond:

The Ascent of Man Henry Drummond, 1894 The Ascent of Man Henry Drummond, 2014-03-29 This Is A New Release Of The Original 1894 Edition Lowell Lectures on the Ascent of Man, by Henry Drummond , 1908 *Ascent Of Man* Henry Drummond, 2023-07-18 Henry Drummond was a Scottish evangelist and writer who became famous for his lectures on the relationship between science and religion The Ascent of Man first published in 1894 is his most famous work and explores the evolution of humanity from a spiritual perspective Drummond argues that scientific progress must be understood in the context of divine revelation and that the ultimate goal of human existence is not material prosperity but spiritual enlightenment The book is a powerful and thought provoking meditation on the meaning of life and the relationship between science and faith This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *The Lowell Lectures on the Ascent of Man* Henry Drummond, 1907 *The Lowell Lectures on the Ascent of Man, by Henry Drummond, ... 3rd Edition* Henry M. Drummond (professeur à Glasgow.), 1894 "The Ascent of Man" by Professor Henry Drummond Smith Samuel, 1894 The Lowell Lectures on the Ascent of Man Henry Drummond, 2015-06-25 Henry Drummond 1851 1897 was a Scottish evangelist writer and lecturer In 1877 he became lecturer on natural science in the Free Church College which enabled him to combine all the pursuits for which he felt a vocation His studies resulted in his writing *Natural Law in the Spiritual World* the argument of which is that the scientific principle of continuity extends from the physical world to the spiritual Before the book was published in 1883 an invitation from the African Lakes Company drew Drummond away to Central Africa His character was full of charm His writings were too nicely adapted to the needs of his own day to justify the expectation that they would long survive it but only few men have exercised more religious influence in their own generation From Slavery to Freedom Charles Huntington Davies, 1900 **The Temptations of Evolutionary Ethics** Paul Lawrence Farber, 1994-10-11 Evolutionary theory tells us about our biological past can it also guide us to a moral future Paul Farber's compelling book describes a century old philosophical hope held by many biologists anthropologists psychologists and social thinkers that universal ethical and social imperatives are built into human nature and can be discovered through knowledge of evolutionary theory Farber describes three upsurges of enthusiasm for evolutionary ethics The first came in the early years of mid nineteenth century evolutionary theories the second in the 1920s and 30s in the years after the cultural catastrophe of World War I and the third arrived with the recent grand claims of sociobiology to offer a sound biological basis for a theory of

human culture Unlike many who have written on evolutionary ethics Farber considers the responses made by philosophers over the years He maintains that their devastating criticisms have been forgotten thus the history of evolutionary ethics is essentially one of oft repeated philosophical mistakes Historians scientists social scientists and anyone concerned about the elusive basis of selflessness altruism and morality will welcome Farber s enlightening book **"The Ascent of Man" by**

Professor Henry Drummond. A Review ... Reprinted from The Christian Samuel SMITH (of Liverpool, M.P. for Flintshire.),1894 *Periodical Articles on Religion, 1890-1899* Ernest Cushing Richardson,1907 **The Bookman** ,1893

The Library of Literary Criticism of English and American Authors: 1891-1904 Charles Wells Moulton,1904 **The Ascent of Man** Henry Drummond,2019-07 The Lowell Institute in Boston Massachusetts founded in 1836 supports an annual series of distinguished lectures Henry Drummond the influential Scottish scientist Free Church minister explorer and evangelist published his Lowell Lectures as *The Ascent of Man* in 1894 This provocative book examines Darwinism in a Christian context It describes the rise of man who is considered the highest purpose of the universe and his relations with the lower animals In particular it addresses the question of altruism and its role in promoting the survival of the fittest which Drummond argues had been overlooked Drummond claims unlike traditional evolutionary theory that the force of evolution is not only the struggle for life but also the struggle for the life of others His book which aroused great interest in its time remains of importance for historians and philosophers of science today

Visions for Racial Equality Harri Englund,2022-02-17 Focusing on David Clement Scott the head of the Church of Scotland mission in Malawi who came to see Europeans as learners in Africa this innovative book narrates the rise and demise of a unique vision for racial equality in nineteenth century Africa By immersing himself in the vernacular language and institutions Scott developed a theology of reversals to pursue justice in race relations It set him on a collision course with the Church colonial government and the White commercial interests spearheaded by Cecil Rhodes Harri Englund shows how Scott s struggle for justice was as much epistemic as political and spiritual a vision for the future in which White and Black would thrive in their mutual recognition as co knowers From linguistic translation to conflicts over land and taxation from slave trade to personal intimacies *Visions for Racial Equality* weaves a rich tapestry of themes in the life and times of a little known visionary **The Voice of**

Science Diarmid A. Finnegan,2021-10-12 For many in the nineteenth century the spoken word had a vivacity and power that exceeded other modes of communication This conviction helped to sustain a diverse and dynamic lecture culture that provided a crucial vehicle for shaping and contesting cultural norms and beliefs As science increasingly became part of public culture and debate its spokespersons recognized the need to harness the presumed power of public speech to recommend the moral relevance of scientific ideas and attitudes With this wider context in mind *The Voice of Science* explores the efforts of five celebrity British scientists John Tyndall Thomas Henry Huxley Richard Proctor Alfred Russel Wallace and Henry Drummond to articulate and embody a moral vision of the scientific life on American lecture platforms

These evangelists for science negotiated the fraught but intimate relationship between platform and newsprint culture and faced the demands of audiences searching for meaningful and memorable lecture performances As Diarmid Finnegan reveals all five attracted unrivaled attention provoking responses in the press from church pulpits and on other platforms Their lectures became potent cultural catalysts provoking far reaching debate on the consequences and relevance of scientific thought for reconstructing cultural meaning and moral purpose **Process and Providence** Bradley J.

Gundlach,2013-11-30 Charles Hodge James McCosh B B Warfield these leading professors at Princeton College and Seminary in the nineteenth and early twentieth centuries are famous for their orthodox Protestant positions on the doctrine of evolution In this book Bradley Gundlach explores the surprisingly positive embrace of developmental views by the whole community of thinkers at old Princeton showing how they embraced the development not only of the cosmos and life forms but also of Scripture and the history of doctrine even as they defended their historic Christian creed Decrying an intellectual world gone evolution mad the old Princetonians nevertheless welcomed evolution properly limited and explained Rejecting historicism and Darwinism they affirmed developmentalism and certain non Darwinian evolutionary theories finding process over time through the agency of second causes God s providential rule in the world both enlightening and polemically useful They also took care to identify the pernicious causes and effects of antisupernatural evolutionisms By the 1920s their nuanced distinctions together with their advocacy of both biblical inerrancy and modern science were overwhelmed by the brewing fundamentalist controversy From the first American review of the pre Darwinian Vestiges of the Natural History of Creation to the Scopes Trial and the forced reorganization of Princeton Seminary in 1929 Process and Providence reliably portrays the preeminent conservative Protestants in America as they defined contested and answered precisely and incisively the many facets of the evolution question **The Edinburgh University Calendar** University of Edinburgh,1894
