Marconi Marc Raboy, 2016-06-28 A little over a century ago the world went wireless Cables and all their limiting inefficiencies gave way to a revolutionary means of transmitting news and information almost everywhere instantaneously By means of Hertzian waves as radio waves were initially known ships could now make contact with other ships saving lives such as on the doomed S S Titanic financial markets could coordinate with other financial markets establishing the price of commodities and fixing exchange rates military commanders could connect with the front lines positioning artillery and directing troop movements Suddenly and irrevocably time and space telescoped beyond what had been thought imaginable Someone had not only imagined this networked world but realized it Guglielmo Marconi As Marc Raboy shows us in this enthralling and comprehensive biography Marconi was the first truly global figure in modern communications Born to an Italian father and an Irish mother he was in many ways stateless working his cosmopolitanism to advantage Through a combination of skill tenacity luck vision and timing Marconi popularized and more critically patented the use of radio waves Soon after he burst into public view at the age of 22 with a demonstration of his wireless apparatus in London 1896 he established his Wireless Telegraph Signal Company and seemed unstoppable He was decorated by the Czar of Russia named an Italian Senator knighted by King George V of England and awarded the Nobel Prize for Physics all before the age of 40 Until his death in 1937 Marconi was at the heart of every major innovation in electronic communication courted by powerful scientific political and financial interests He established stations and transmitters in every corner of the globe from Newfoundland to Buenos Aires Hawaii to Saint Petersburg Based on original research and unpublished archival materials in four countries and several languages Raboy s book is the first to connect significant parts of Marconi s story from his early days in Italy to his groundbreaking experiments to his protean role in world affairs Raboy also explores Marconi s relationships with his wives mistresses and children and examines in unsparing detail the last ten years of the

inventor's life when he returned to Italy and became a pillar of Benito Mussolini's fascist regime Raboy's engrossing biography which will stand as the authoritative work of its subject proves that we still live in the world Marconi created

The Resurrection of Jesus Michael R Licona, 2020-05-21 The question of the historicity of Jesus' resurrection has been repeatedly probed, investigated and debated. And the results have varied widely. Perhaps some now regard this issue as the burned over district of New Testament scholarship. Could there be any new and promising approach to this problem? Yes, answers Michael Licona. And he convincingly points us to a significant deficiency in approaching this question: our historiographical orientation and practice. So he opens this study with an extensive consideration of historiography and the particular problem of investigating claims of miracles. This alone is a valuable contribution. But then Licona carefully applies his principles and methods to the question of Jesus' resurrection. In addition to determining and working from the most reliable sources and bedrock historical evidence, Licona critically weighs other prominent hypotheses. His own argument is a challenging and closely argued case for the historicity of the resurrection of Jesus the Christ. Any future approaches to dealing with this prize puzzle of New Testament study will need to be routed through *The Resurrection of Jesus*. The Rescue of the Third Class on the Titanic David Gleicher, 2017-10-18 This work seeks to understand why a disproportionately large number of third class passengers, particularly women and children, died during the sinking of the Titanic in relation to the first and second classes. It examines the gender, class, social and cultural factors that influenced this disparity. It aims to uncover both why and how five hundred and thirty-one third class passengers died on the night of April 14th, 1912. A key area of focus is the difficult relationship between the ship's authorities and the men of the third class and the extent to which this determined the fate of passengers during the rescue efforts. The introduction asks: Who were the third class passengers and uses ethnic and economic backgrounds to suggest the third class belonged to the Old Immigration wave of migrants rather than the contemporary New Immigration of the first and second. The first chapter concerns the exclusion of third class narratives in the popular story of the Titanic. Chapters two through seven determine the whereabouts of the third class during every stage of evacuation and flags the discrepancies in testimonies from both the British and American inquiries. Chapter eight provides a conclusion which claims the popular story includes a great many falsehoods with regard to the third class, including their treatment by crew, their behaviours and their survival rates. The first appendix tables nationalities into regions; the second outlines the twenty routes to the lifeboats as testified by one of the Titanic design architects; and the third provides deck plans for every level of the ship. **The Titanic** Eugene L. Rasor, 2001-09-30 Promoted as virtually unsinkable, the ultimate luxury liner, the largest ship in the world, the RMS Titanic sank on its maiden voyage in April 1912, taking some 1,500 people to their death. Aboard the ship were the wealthy and famous as well as

hundreds of immigrants seeking a new life in America The most dramatic marine disaster of modern times the Titanic tragedy captured the interest and imagination of the entire world The intensity of interest in the catastrophe has increased particularly after discovery of the wreck off the coast of Newfoundland in the mid 1980s The resulting literature is vast including both scholarly and popular sources Covering more than the published literature the book also surveys memorabilia artifacts cultural icons music film and exhibitions Divided into three sections the work opens with a historiographical survey of the literature then includes descriptive lists of more peripheral material and concludes with a bibliography of 674 entries All items covered in the historiographical survey are included in the bibliography This useful guide will appeal to researchers both laymen and scholars interested in the Titanic

Saving Human Lives Robert E. Allinson, 2006-05-20 This is a pioneering work Recent disasters such as the tsunami disaster continue to demonstrate Professor Allinson's thesis that valuing human lives is the core of ethical management His unique comparison of the ideas of the power of Fate and High Technology his penetrating analysis of the very concept of an accident demonstrate how concepts rule our lives His wide ranging investigation of court cases and government documents from the seventeenth through the twentieth centuries and from places as diverse as the USA UK and New Zealand provide ample supporting evidence for the universality and the power of explanation of his thesis Saving Human Lives will have an impact beyond measurement on the field of management ethics

Four Thousand Lives Lost Alastair Walker, 2012-03-31 Over four years four ships were lost under different circumstances and 4 000 lives with them but one thing linked them all it was John Charles Bigham Lord Mersey who was appointed to head the inquiries into each disaster Mersey is often referred to as a company man or a government stooge But is this the whole truth Everyone has heard of Titanic and Lusitania but more passengers died when the Empress of Ireland sank in May 1914 That inquiry turned into a head to head between an American lawyer and a British one Did Mersey let the right man win Was he fair to Captain Lord of the Californian when he blamed him for the loss of so many lives on Titanic The U Boat that sank the Falaba with the loss of 104 lives behaved very differently to the one that torpedoed the Lusitania just six weeks later Did Mersey reflect that in his findings or was he more interested in propaganda than truth

When That Great Ship Went Down: The Legal and Political Repercussions of the Loss of RMS Titanic GMW Wemyss, Markham Shaw Pyle, 2012-04-14 Titanic sank in 1912 in the midst of a US presidential campaign and in the week in which the British government fought to give Home Rule to Ireland JP Morgan whose trusts owned the shipping line became an immediate political target Shares in the Marconi companies credited with saving the survivors rocketed and three members of the British Cabinet had illicit share holdings in Marconis The shipbuilders refused to admit that the 1500 dead had died because their settled scientific consensus and US immigration laws had doomed them And a few staunch lawyers and judges in Britain and America refused to let political corruption and influence sway them from their duties Praised by James Delingpole Anne Elisabeth Moutet this is the story of the skulduggery and shabby compromises of 1912 the eventual revolution in safety

measures that came of the disaster and how Titanic sails on in shaping the modern world

The Loss of the S. S. Titanic - Its Story and Its Lessons Lawrence Beesley, 2010-10-15 In this dramatic real life tale Lawrence Beesley tells first hand what it was like to be on the Titanic as it plunged into the icy waters of the North Atlantic on that fateful night in April 1912 Beesley wrote this book and it was published just nine weeks after the disaster Could the Titanic sinking have been averted Was there a fundamental design flaw Did Titanic break in two as it sank Why did so many people die in the disaster Its a story of what went wrong of human endeavour and what lessons were learned First published 1912 and now republished in 2010 by InfoTech Communications UK

Voices from the Carpathia: Rescuing RMS Titanic George Behe, 2015-05-04 When Titanic began sending out distress calls one of the first to reply was the Cunard liner Carpathia As it turned out Carpathia was the only vessel to reach the scene in time to save the lives of any of Titanic s passengers and after she arrived in New York reporters crowded the pier and vied with each other to obtain interviews with the survivors of the disaster In their zeal to interview survivors though the reporters brushed past other people who could have provided their own eyewitness accounts namely Carpathia s own passengers largely left to their own devices as to how and when they discussed their participation in events A few wrote letters to relatives others wrote accounts intended for publication The author s collection of these rare written accounts and interviews sheds new light on the tragic way the lives of so many were impacted by the loss of the largest passenger liner in the world

You are what You Hear Harry Witchel, 2010 Pondering the musicality of everything from bird songs to the language he calls motherese Dr Witchel illustrates the power of music and addresses the questions Why do we have music What does music do to our emotions Can animals hear and understand music What does music do to your brain Why do people listen to sad music Why do some people like classical but others only like heavy metal Is there some essential feature to all music You Are What You Hear is an erudite and entertaining study that is unique in many ways No other book has thoroughly elaborated the connection between music and social territory in humans although in other music making species scientists have shown this connection to be clear cut Given the wealth of scientific evidence and historical narratives presented in You Are What You Hear an intellectual investigation of this avenue is long overdue Written by a psychobiologist the work straddles hard science and psychology approaching music from a unique interdisciplinary perspective Successfully bridging these strands of evidence You Are What

You Heare lucidates the significance of territory not only in music but in daily life This lively and engaging book will have a broad appeal not only to the general public but to students interested in the relationship between music and culture Anyone from seventeen to ninety seven will have the potential to gain something from this book **One Hundred and Sixty Minutes** William Elliott Hazelgrove, 2021-09-01 One hundred and sixty minutes That is all the time rescuers would have before the largest ship in the world slipped beneath the icy Atlantic There was amazing heroism and astounding incompetence against the backdrop of the most advanced ship in history sinking by inches with luminaries from all over the world It is a story of a network of wireless operators on land and sea who desperately sent messages back and forth across the dark frozen North Atlantic to mount a rescue mission More than twenty eight ships would be involved in the rescue of Titanic survivors along with four different countries At the heart of the rescue are two young Marconi operators Jack Phillips 25 and Harold Bride 22 tapping furiously and sending electromagnetic waves into the black night as the room they sat in slanted toward the icy depths and not stopping until the bone numbing water was around their ankles Then they plunged into the water after coordinating the largest rescue operation the maritime world had ever seen and thereby saving 710 people by their efforts The race to save the largest ship in the world from certain death would reveal both heroes and villains It would begin at 11 40 PM on April 14 when the iceberg was struck and would end at 2 20 AM April 15 when her lights blinked out and left 1500 people thrashing in 25 degree water Although the race to save Titanic survivors would stretch on beyond this most people in the water would die but the amazing thing is that of the 2229 people 710 did not and this was the success of the Titanic rescue effort We see the Titanic as a great tragedy but a third of the people were rescued and the only reason every man woman and child did not succumb to the cold depths is due to Jack Phillips and Harold McBride in an insulated telegraph room known as the Silent Room These two men tapping out CQD and SOS distress codes while the ship took on water at the rate of 400 tons per minute from a three hundred foot gash would inaugurate the most extensive rescue operation in maritime history using the cutting edge technology of the time wireless **The Parliamentary Debates (official Report)**.
