

Dictionary Guide Words Practice #1

Guide words appear at the top of dictionary pages. The first guide word is the first entry word on that page. The second guide word is the last entry word on that page. Use guide words to help you find the word you are looking for more quickly.

- A. Read each pair of guide words (on the left). Then circle the word that would not be found on a dictionary page with those guide words.

1. clock ~ clue	close	clover	clump	club
2. director ~ disc	dirt	disable	disband	discard
3. hold ~ homemade	holiday	homesick	holly	homely
4. model ~ mole	moment	moist	modern	mold
5. offer ~ old	office	offense	offset	oil
6. pit ~ place	pitch	pirate	pizza	pode
7. reptile ~ resident	require	research	reproof	reset
8. stampede ~ star	stammer	stance	stand	staple
9. trinket ~ trophy	triple	triumph	tropic	trooper
10. yelp ~ you've	yes	yield	young	yowl

- B. If your name was in the dictionary, what would the guide words on your page be?

Handwriting Features Guide Nicole Crown, Raymond Marquis, Carolyne Bird, 2024-06-27 Forensic handwriting examination follows a process comprised of four main steps Analysis Comparison Evaluation and Verification ACE V While the process itself has been described and refined very little effort has been undertaken to establish a clear and detailed list of features that the forensic handwriting examiner FHE must analyse in the first step of the examination In depth analysis of

graphical features of handwritten texts or signatures is integral to the work of FHEs when requested to give an expert opinion typically to determine whether a questioned handwritten item has been written by a specific writer Indeed it is these graphical features that will be compared between questioned and known samples to establish similarities and differences that will finally be evaluated under two or more mutually exclusive propositions to reach a conclusion A robust analysis based on clearly defined features is necessary to provide reliable and unbiased opinions Numerous books and articles describe handwriting features that should be observed during the analysis stage of the examination However the descriptions can be vague and several authors may use different terms to describe the same feature It may also happen that the same term is used to define different characteristics Moreover illustrations of terms are often scarce and some times of little help to understand what the corresponding features are These problems are exacerbated when trying to equate terms in different languages This project presents a comprehensive depiction of writing features particularly found in Latin script relating to the whole hand written text or signature which the authors consider relevant to help answer questions commonly addressed by FHEs It is the authors hope that the FHE community utilises this illustrated list of writing features which we believe can promote a thorough and complete analysis and provide a common language for FHEs Thus this project seeks to contribute to establishing a systematic and standardized approach to forensic handwriting examination and move the discipline towards reproducibility and validation

Cognitive Lexicography Carolin Ostermann, 2015-07-31 English lexicography and linguistics have always shared close ties yet the potential of cognitive linguistics for lexicography has only been hesitantly acknowledged in the literature This is what cognitive lexicography attempts to change by using insights gained in cognitive semantic research for the development of new dictionary features After a short survey of the history and practice of English monolingual learner lexicography as well as an outline of the relationship between linguistics and lexicography three new dictionary features are developed They cover three different cognitive semantic theories as well as three different parts of the monolingual dictionary entry each time for a new set of lexemes Frame semantics conceptual metaphor theory as well as cognitive conceptions of polysemy are used to create a new example section for agentive nouns a new defining structure for emotion terms and a new microstructural arrangement for particle entries Dictionary analyses on all as well as user studies on two of the features complement these suggestions The monograph thus presents a new approach to lexicography that incorporates into its description of lexical items how humans perceive and conceptualise language
