Digital Humanities in Medieval and Early Modern Spanish Texts Roberto J. González Zalacain, Gael Vaamonde, 2025-03-31 This volume fills a gap in the literature on digital humanities (DH) in the Hispanic context by gathering a heterogeneous group of specialists who from different standpoints in the humanities explore Spanish texts as the object of study, DH as the work methodology, and Medieval and Early Modern Times as the historical framework. The volume gathers authors from Spain and other countries who work at the intersections of the DH and the areas of history, philology, literature, or linguistics to explore some of the diverse DH projects working on Spanish texts from this period and their wider implications. Taking historical sources as the starting point, contributions to this volume include topics such as historical corpus design, TEI-based digital edition, 3D modelling, database architecture, or automatic text annotation. For readers interested in the subject, the book provides a stimulating discussion with in-depth and concrete analyses of the interrelationships between the different contributions. This

volume will be of great interest to medievalists and early modern researchers whether involved in linguistic historical or literary studies demonstrating the advantages of considering digital tools and computational methods in their academic work In addition it will also appeal to postgraduate students in the field of DH

Metal Recovery from Electronic Waste: Biological Versus Chemical Leaching for Recovery of Copper and Gold Arda Işildar, 2018-10-30 Waste electrical and electronic equipment WEEE generation is a global problem Despite the growing awareness and deterring legislation most of the WEEE is disposed improperly i e landfilled or otherwise shipped overseas and treated in sub standard conditions Informal recycling of WEEE has catastrophic effects on humans and the environment WEEE contains considerable quantities of valuable metals such as base metals precious metals and rare earth elements REE Metal recovery from WEEE is conventionally carried out by pyrometallurgical and hydrometallurgical methods In this PhD research novel metal recovery technologies from WEEE are investigated Using acidophilic and cyanide generating bacteria copper and gold were removed from crushed electronic waste with removal efficiencies of 98.4 and 44.0% respectively The leached metals in solution were recovered using sulfidic precipitation and electrowinning separation techniques Finally a techno economic assessment of the technology was studied This research addresses the knowledge gap on two metal extraction approaches namely chemical and biological from a secondary source of metals The essential parameters of the selective metal recovery processes scale up potential techno economic and sustainability assessment have been studied

Design Issues, 2011

Using Computers in the Translation of Literary Style Roy Youdale, 2019-06-13 This volume argues for an innovative interdisciplinary approach to the analysis and translation of literary style based on a mutually supportive combination of traditional close reading and distant reading involving corpus linguistic analysis and text visualisation The book contextualizes this approach within the broader story of the development of computer assisted translation including machine translation and the use of CAT tools and elucidates the ways in which the approach can lead to better informed translations than those based on close reading alone This study represents the first systematic attempt to use corpus linguistics and text visualisation in the process of translating individual literary texts as opposed to comparing and analysing already published originals and their translations Using the case study of his translation into English of Uruguayan author Mario Benedetti's 1965 novel *Gracias por el Fuego* Youdale showcases how a close and distant reading approach CDR enhances the translator's ability to detect and measure a variety of stylistic features ranging from sentence length and structure to lexical richness and repetition both in the source text and in their own draft translation thus assisting them with the task of revision The book reflects on the benefits and limitations of a CDR approach its scalability and broader applicability in translation studies and related disciplines making this key reading for translators postgraduate students and scholars in the fields of literary translation corpus linguistics corpus stylistics and narratology

Bridging the Gap between Requirements Engineering and Software Architecture Azadeh Alebrahim, 2017-04-06 This book systematically identifies the lack of methodological support

for development of requirements and software architecture in the state of the art To overcome this deficiency the QuaDRA framework is proposed as a problem oriented approach It provides an instantiation of the Twin Peaks model for supporting the intertwining relationship of requirements and software architecture QuaDRA includes several structured methods which guide software engineers in quality and pattern based co development of requirements and early design alternatives in an iterative and concurrent manner *Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971*

Regulation of Vascular Function by Circulating Blood Joseph M. Rifkind,Dan E. Berkowitz,Joy G. Mohanty,2019-08-19 *Elementary Cluster Analysis* James C. Bezdek,2022-10-17 The availability of packaged clustering programs means that anyone with data can easily do cluster analysis on it But many users of this technology don t fully appreciate its many hidden dangers In today s world of grab and go algorithms part of my motivation for writing this book is

to provide users with a set of cautionary tales about cluster analysis for it is very much an art as well as a science and it is easy to stumble if you don't understand its pitfalls. Indeed it is easy to trip over them even if you do. The parenthetical word usually in the title is very important because all clustering algorithms can and do fail from time to time. Modern cluster analysis has become so technically intricate that it is often hard for the beginner or the non-specialist to appreciate and understand its many hidden dangers. Here's how Yogi Berra put it and he was right. In theory there's no difference between theory and practice. In practice there is. Yogi Berra. This book is a step backwards to four classical methods for clustering in small static data sets that have all withstood the tests of time. The youngest of the four methods is now almost 50 years old. Gaussian Mixture Decomposition GMD 1898. SAHN Clustering principally single linkage SL 1909. Hard c means HCM 1956 also widely known as aka k means. Fuzzy c means FCM 1973 reduces to HCM in a certain limit. The dates are the first known writing to me anyway about these four models. I am with apologies to Marvel Comics very comfortable in calling HCM FCM GMD and SL the Fantastic Four. Cluster analysis is a vast topic. The overall picture in clustering is quite overwhelming so any attempt to swim at the deep end of the pool in even a very specialized subfield requires a lot of training. But we all start out at the shallow end or at least that's where we should start and this book is aimed squarely at teaching toddlers not to be afraid of the water. There is no section of this book that if explored in real depth cannot be expanded into its own volume. So if your needs are for an in-depth treatment of all the latest developments in any topic in this volume the best I can do what I will try to do anyway is lead you to the pool and show you where to jump in.
