High Pressure Surface Science and Engineering Yury Gogotsi,V. Domnich,2019-09-19 In many instances of mechanical interaction between two materials the physical contact affects only the outermost surface layer with little discernible influence on the bulk of the material The resultant high pressures in these localised regimes can induce surface structural changes such as deformation phase transformation and amorphization **International Encyclopedia of Transportation** ,2021-05-13 In an increasingly globalised world despite reductions in costs and time transportation has become even more important as a facilitator of economic and human interaction this is reflected in technical advances in transportation systems increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts This has become particularly acute with the impact that Covid 19 has had on transportation across the world at local national and international levels Encyclopedia of Transportation Seven Volume Set
