Raun, 2025-05-01 Andrew Sansom is known as the Teddy Roosevelt of Texas because he protected more than a half million acres of land in parks nature preserves and wildlife management areas following in the footsteps of the early 20th Century president who protected millions of acres in public lands Sansom's leadership style is based on compromise and common ground providing those who want to conserve natural resources and those who want to monetize them a means to work together In the world of Texas conservation the figure of Andrew Sansom looms large Few can match Sansom's contributions to the natural landscape of Texas such as the over 500 000 acres of state parks and wildlife management areas he helped

protect during his leadership at the Texas Parks and Wildlife Department He has spent a lifetime finding common ground between those who want to conserve natural resources and those who want to monetize them Sansom s gift has been finding the formula for persuading landowners in Texas where private property rights dominate public policy that conserving their natural assets provides a measurable financial return as well as an emotional one Over the course of his career Sansom has become well acquainted with the rough and tumble of Texas politics especially where it concerns the environment After his trailblazing work at TPWD he went on to establish The Meadows Center for Water and the Environment at Texas State University which has become one of the state s premier research and education centers for the study of water and watersheds Andrew Sansom A Life in Conservation chronicles Sansom s journey as an environmentalist a fundraiser a professor an author and most importantly a central figure in the history of conservation in Texas At a time when our public lands are being opened up for commerce as never before we are at risk of losing not only habitat and wildlife diversity but also a visceral connection to nature Sansom s life story offers inspiration and useful lessons in finding ways to protect our environment while allowing sustainable development for future generations COMPUTER SCIENCE NARAYAN
