4th Grade STAAR Test Prep Mark Shannon, 2018-01-22 This test prep is good for kids who are on the fence and having trouble passing or need to increase their margin These kids will often say I DON T KNOW WHERE TO START when explaining their confusion This book address that problem with three approaches 1 In contrast with the other study guides that use random questions in their practice exams this book collated the questions into chapters based on the logic to solve them The 4th The grade book is divided into seven chapters They are Logic Arithmetic Geometry Fractions Reading Graphs and tables Measurements including a ruler and basic statistics This book teaches basics then goes into practice exams with word problems Once the student is proficient with the questions organized into chapters then they are ready for random questions 2 This study guide has thousands of practice problems I have placed over 3100 videos on YouTube showing you how to work the problems 3 I reviewed several years of past exams and placed enfaces on the easiest and most common questions Mastering these questions should yield a 75% to 80% If a student is already achieving this percentage the other guides or web site with random questions and covering all material might be best A book might be better for your student than the web sites for two reasons 1 The more common and easiest questions are using a ruler to measure The web designers don t know the size of your computer screen and can t determine if the student has measured correctly We can get a high percentage of these problems easily 2 When studying on a computer there are too many websites with the answers With a book parents can have greater assurance the work is being done This book is developed by a trained professional out of concern It is not the product of a large publishing house It is the results of one person who wants to help Best Regards Mark Shannon

Math Mammoth Discovery Word Problems Maria Miller, 2025-06-12 Math Mammoth Discovery Word Problems is intended for students in 4th grade and above that need more practice with word problems I especially aim to help students in grades 4 7 who have trouble with word problems and who may need to go almost back to the beginning so to speak to learn to solve them The skills covered include addition subtraction multiplication division large numbers divisibility units of measurement bar models in problem solving average geometry fractions and decimals The problems require knowledge of fourth grade math such as long division long multiplication knowledge of basic measurement units and the usage of several operations However there are only a few worksheets dedicated to fractions and decimals and the problems in general do not require calculations with fractions or decimals with the exception of money amounts The book presents a variety of situations many of them about animals and farming so that students will have some fun as they look for and discover the solutions Mathy the Mammoth with his obsession with blueberries is featured several times and students will also go hiking and traveling around the world There are also some challenging word problems marked as such and interesting puzzle corners Some worksheets have examples and some instruction related to problem solving Students are often encouraged to write down the calculations they do I suggest that you also encourage your student s to make a drawing or a sketch of the situation in the problem if applicable to help them understand the situation and to see what math operation is involved Overall the problems in this collection require multiple steps with the exception of question 1 in worksheet Division Warm Up as it focuses on differentiating what math operation should be used
