Stakeholders In Action:

Stakeholders in Action Rita Cancino, Lise-Lotte Holmgreen, 2014 The relationship between organizations and the communities in which they operate has been the focus of much attention over the past decades both in real life organizational contexts and in research From an organizational point of view a central concern in this development is the identification of stakeholders and stakeholder roles which may pave the way for dedicated management and communication strategies to enhance and bolster relationships This book follows in the footsteps of the many researchers who have studied and explored the field However as opposed to much of the current literature which often takes a primarily theoretical approach to the study of stakeholders and stakeholder management the chapters in this volume are first and foremost focused on the practical aspects of the field Thus through seven separate case studies the book discusses how stakeholders are constructed implicitly and explicitly in corporate and institutional contexts investigating the possible consequences of these constructions for the communication and engagement between stakeholders and organizations a compilation of major articles based upon solid research findings and covers private public and NGO corporate and institutional forums An impressive and seminal body of scholarship Stakeholders in Action is recommended as a core addition to corporate and academic library Business Management Studies reference collections and supplemental reading lists Midwest Book Review MBR Bookwatch Vogel s Bookshelf March 2015 Subject Organizational Management Business

Stakeholders Andrew L. Friedman, Samantha Miles, 2006-04-13 The research on social discourse in societies firms and organizations written by researchers working in fields such as Management Corporate Governance Accounting and Finance Strategy Sociology and Politics often make reference to the term stakeholder Yet the concept of the stakeholder is unclear and research around it often muddled This book provides an analysis classification and critique of the various strands of theory about stakeholders The authors place these theories both in the context of their philosophical underpinnings and their practical and policy implications Practical examples based on new data are used to examine a diverse range of stakeholders and the relationships stakeholders have with their organizations This is the first book on stakeholder theory to propose a critical analysis both at the macro and micro level that is framed and guided by theory Written to provide both order and clarity to research into the concept of the stakeholder the book is also written as an introduction for students It includes chapter introductions useful tables and figures short vignettes on key concepts and issues and discussion questions

Unfolding Stakeholder Thinking Jörg Andriof, Sandra Waddock, Bryan Husted, Sandra Sutherland Rahman, 2017-09-08 This book the first of a two volume series argues that today stakeholder thinking has evolved into the study of interactive mutually engaged and responsive relationships that establish the very context of doing modern business and create the groundwork for transparency and accountability This book makes it clear that in today's societies successful companies are those that recognize that they have responsibilities to a range of stakeholders that go beyond mere compliance with the law or meeting the fiduciary responsibility inherent in maximizing returns to shareholders If in the past the focus was on enhancing shareholder value now it is on engaging stakeholders for long term value creation The process of engagement creates a dynamic context of interaction mutual respect dialogue and change not a one sided management of stakeholders Indeed the authors believe the very term stakeholder management to be outdated and corporate centric Companies can manage their relationships with stakeholders but frequently cannot actually manage the stakeholders themselves because as the activist and collaborative initiatives described in this volume suggest company stakeholder relationships are not one way streets and different institutions bring different agendas goals and priorities to the engagement There are clear implications to the way in which stakeholder thinking is unfolding today If in the past corporate social responsibility was simply seen as profitability plus compliance plus philanthropy now responsible corporate citizenship or corporate responsibility means companies being more aware of and understanding the societies in which they operate Corporate responsibility means recognising that day to day operating practices affect stakeholders and that it is in those impacts where responsibility lies not merely in efforts to do good Companies are now faced with a wide array of challenges that mean that senior executives and managers need to be able to deal with issues including greater accountability human rights abuses sustainability strategies corporate governance codes workplace ethics stakeholder consultation and management Stakeholder thinking needs to capture these new realities The global reach of multinational corporations has served to highlight the need for the re integration of business into society relationships into stakeholder relations and ethics into managerial practice The rise in power of global activism involving NGOs and global business involving multinational corporations makes it even more critical today for companies to consider the power and interests of corporate stakeholders when developing strategic plans The interactivity and mutuality of relationships described in this book make it clear that firms and stakeholders share the power and responsibility to influence both the profit potential of the firm and how the benefits of the firm's success impact on society This important volume brings together leading academic thought on stakeholder thinking for the first time Unfolding Stakeholder Thinking will be indispensable to corporate

managers NGOs and academics seeking greater understanding of the dynamics of stakeholder thinking in a world of rapidly changing responsibilities A companion volume *Unfolding Stakeholder Thinking 2* focusing on practical issues such as relationship management communication reporting and performance is also available [The Digest of English Case Law](#)

John Mews,1898 **A Stakeholder Approach to Corporate Social Responsibility** Philip Kotler,François

Maon,2016-03-16 Corporate social responsibility has grown into a global phenomenon that encompasses businesses consumers governments and civil society and many organizations have adopted its discourse Yet corporate social responsibility remains an uncertain and poorly defined ambition with few absolutes First the issues that organizations must address can easily be interpreted to include virtually everyone and everything Second with their unique often particular characteristics different stakeholder groups tend to focus only on specific issues that they believe are the most appropriate and relevant in organizations corporate social responsibility programs Thus beliefs about what constitutes a socially responsible and sustainable organization depend on the perspective of the stakeholder Third in any organization the beliefs of organizational members about their organization s social responsibilities vary according to their function and department as well as their own managerial fields of knowledge A Stakeholder Approach to Corporate Social Responsibility provides a comprehensive collection of cutting edge theories and research that can lead to a more multifaceted understanding of corporate social responsibility in its various forms the pressures and conflicts that result from these different understandings and some potential solutions for reconciling them *Event Management: Putting theory into practice - A South African*

Chandler,2019-08-13 A holistic perspective for navigating and exploring the CSR landscape *Strategic Corporate Social Responsibility Sustainable Value Creation Fifth Edition* redefines corporate social responsibility CSR as being central to the value creating purpose of the firm and provides a framework that firms can use to navigate the complex and dynamic business landscape Based on a theory of empowered stakeholders this bestselling text argues that the responsibility of a corporation is to create value broadly defined The primary challenge for managers today is to balance the competing interests of the firm s stakeholders understanding that what they expect today may not be what they will expect tomorrow

This tension is what makes CSR so demanding but it is also what makes CSR integral to the firm's strategy and day to day operations
