McKirahan, 2021-12-16 An astounding project of analysis on more than one hundred translations of ancient philosophical texts, this index of words found in the *Ancient Commentators on Aristotle* series comprises some 114,000 entries. It forms in effect a unique dictionary of

philosophical terms from the post Hellenistic period through to late antiquity and will be an essential reference tool for any scholar working on the meaning of these ancient texts As traditional dictionaries have usually neglected to include translation examples from philosophical texts of this period scholars interested in how meanings of words vary across time and author have been ill served This index fills a huge gap therefore in the lexical analysis of ancient Greek and has application well beyond the reading of ancient philosophical commentaries Bringing together the full indexes from 110 of the volumes published in Bloomsbury s Ancient Commentators on Aristotle series McKirahan has combined each word entry and analysed how many times particular translations occur He presents his findings numerically so that each meaning in turn has a note as to the number of times it is used For meanings that are found between one and four times the volume details are also given so that readers may quickly and easily look up the texts themselves Monthly Catalog of United States Government Publications ,1983 *Manuscripts, Texts, Theology* David C.
