Daily Graphic Kingsley Inkoom,2014-09-04 *The Grammar of Knowledge* Alexandra Y. Aikhenvald,R. M. W. Dixon,2014-02-28 The Grammar of Knowledge offers both a linguistic and anthropological perspective on the expression of information sources as well as inferences assumptions probability and possibility and gradations of doubt and beliefs in a range of languages The book investigates twelve different languages from families including Tibeto Burman Nakh Dagestani and Austronesian all of which share the property of requiring the source of information to be specified in every sentence In these languages it may not be possible to say merely that the man went fishing Instead the source of evidence for the statement must also be specified usually through the use of evidential markers For example it may be necessary to indicate whether the speaker saw the man go fishing has simply assumed that the man went fishing or was told that he went fishing by a third party Some languages such as Hinuq and Tatar distinguish between first hand and non first hand information sources others such as Ersu mark three distinct types of information directly required inferred or assumed and reported Some require an even greater level of specification Ash ninka Peren from South America has a specific marker to express suspicions or misgivings Like others in the series the book illustrates and examines these aspects of language in different cultural and linguistic settings It will interest linguists of all persuasions as well as linguistically minded anthropologists

Children, Childhood, and the Future Andrea Kleeberg-Niepage, 2020-01-10 Although most of the world s children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children s lives
