The Oxford Guide to the Bantu Languages Lutz Marten, Ellen Hurst-Harosh, Nancy C. Kula, Jochen Zeller, 2025-08-19 This volume brings together leading scholars from Africa Europe the Americas and beyond to provide a detailed account of the languages of the Bantu family which cover an area from Cameroon and Kenya in the north to South Africa in the south The Bantu family is

part of the Niger Congo phylum and one of the world's biggest language groups comprising around 500 languages. The family includes major languages with large numbers of speakers such as Zulu, Kinyarwanda and Swahili, the most widely spoken and taught African language, as well as many community languages and several endangered languages. Bantu languages feature prominently in the complex and multilingual language ecologies that are characteristic of the linguistic situation in much of Africa and they provide rich evidence for the study of theoretical and comparative linguistics, language contact and language change. They play an important role in education, commerce, culture and artistic expression in the media and public discourse in governance and social justice and are central to the future of the continent and the well-being of its communities. The first part of *The Oxford Guide to the Bantu Languages* provides background and context with chapters exploring the history of research in the field, language and prehistory in Bantu-speaking Africa and typology and variation. Chapters in the second part offer broad comparative overviews of Bantu phonology, morphology, syntax, semantics and pragmatics, socio and applied linguistics. Before Parts III-VII cover more specific topics in Bantu linguistics across a variety of subfields ranging from structural issues such as the augment and melodic tone to historical and sociolinguistic topics such as Bantu languages in the diaspora and language policy and standardization. The chapters in the final part offer individual structural overviews of a range of languages from across the Bantu-speaking area. The book will be an essential resource for students and researchers specializing in the Bantu languages and for typologists and comparative linguists more broadly.

Child Language Barbara C. Lust, 2006-09-21. The remarkable way in which young children acquire language has long fascinated linguists and developmental psychologists alike. Language is a skill that we have essentially mastered by the age of three and with incredible ease and speed despite the complexity of the task. This accessible textbook introduces the field of child language acquisition, exploring language development from birth. Setting out the key theoretical debates, it considers questions such as what characteristics of the human mind make it possible to acquire language, how far acquisition is biologically programmed and how far it is influenced by our environment, what makes second language learning in adulthood different from first language acquisition and whether the specific stages in language development are universal across languages. Clear and comprehensive, it is set to become a key text for all courses in child language acquisition within linguistics, developmental psychology and cognitive science.

A History of African Linguistics H. Ekkehard Wolff, 2019-06-13. The first global history of African linguistics as an emerging autonomous academic discipline covering Africa, the Americas, Asia, Australia and Europe.

African Languages in Classrooms and Academia: Intellectualisation and Empowerment through Formal Education Xolisa Tshongolo, 2024-12-02. To date, there have been few comprehensive books published which deal specifically with the role of African languages in academia and formal education. Motinyane Mletshe and Tshongolo as editors have produced a book that fills this gap. In this timely collection of 21 chapters written in African languages and English, the contributors offer a critique of both language practice in the classroom as well as language planning, policy creation and

implementation challenges A timely and innovative contribution in the area of language in education teaching pedagogy as well as multilingualism Using Online Dictionaries Carolin Müller-Spitzer, 2014-02-27 Until now there has been very little research into the use of online dictionaries In contrast the market for online dictionaries is increasing both for academic lexicography and for commercial lexicography with sales figures for printed reference works in continual decline This has led to a demand for reliable empirical information on how online dictionaries are actually being used and how they could be made more user friendly The volume *Using Online Dictionaries* makes a substantial contribution to closing this research gap It is divided into four parts The first part contains articles on fundamental issues a research review of the empirical studies on digital dictionaries which have already been carried out and a brief methodological guideline for lexicographical researchers who are interested in conducting their own empirical research The second part contains the results of two studies that focus on general questions about the use of online dictionaries It presents empirical data on contexts of dictionary use on expectations and demands regarding online dictionaries Furthermore innovative features such as the use of multimedia elements or the option of a user adaptive interface and questions of design were assessed empirically The third part of this volume comprises more specific studies of online dictionaries an eye tracking study evaluating the new web design of the dictionary portal OWID and a log file study which tries to get to the bottom of the following question Do dictionary users look up frequent words or put differently is there a connection between how often a word is looked up and how often it appears in a corpus In the last chapter of this thematic section the question of how users judge the combination of a written paraphrase and an additional illustration in illustrated online dictionaries is addressed The last part focuses on the use of monolingual dictionaries in particular the German online dictionary *lexiko* In this context two online questionnaire based studies were carried out The empirical studies were conducted in the form of online surveys combining questionnaires and experimental elements and in the form of laboratory studies using eye tracking technology as well as using observational methods such as log file analyses Regarding the comprehensive research framework this volume can be relevant to lexicographers metalexicographers and linguists who are interested in the use of online dictionaries and in the development and exploration of lexicographical data for the internet as well as linguists interested in empirical methods It addresses a broad expert audience by presenting an academic subject which is currently the focus of much discussion
