Can Work Frans Rautenbach,2017-08-18 What will it take to turn South Africa around In this insightful and provocative book Frans Rautenbach proposes a complete overhaul of policy thinking and provides fresh arguments that effectively address South Africa's unemployment, race problems and lack of education Rautenbach examines the fundamental problem of rent seeking to which he proposes two antidotes: the free market and decentralisation of government Along the way he tackles holy cows such as affirmative action, trade unions, labour law and welfare payments He also addresses contentious topics such as racism, white privilege, political correctness, state funding of higher education and mounting evidence that trade unions substantially suppress employment growth Written by a labour lawyer with a proven track record in a range of policy issues South Africa Can Work speaks effectively to a cross section of readers of all disciplines and brings sorely needed good news

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman,2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge *Discrimination in an Unequal World* explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies, the democratization of inequality and the disappearance of traditional categories
