Labor Contestation at Walmart Brazil Scott B. Martin, João Paulo Cândia Veiga, Katiuscia Moreno Galhera, 2021-09-10 This book explores how and why the labor practices of the world's largest employer supermarket giant Walmart were contested by unions and government regulators as it expanded to Latin America starting in the 1990s With an in depth case study of Brazil and a comparative chapter examining Argentina Chile and Mexico this book analyzes the problematic encounter between diffusion of home office anti labor practices and evolving national institutional contexts that are quite varied and in some cases enable considerable resistance by unions and or regulators Walmart's repressive familial and anti union model is found to generate costs and conflicts that contributed to its unprofitability and ultimate exit from Brazil in 2018 This experience contrasted with country situations where Walmart's overall competitive and labor and human resource practices fit better with national markets and institutions underlines the brittle problematic nature of diffusionist corporate models lacking adaptive capacity to significant cross national variations across host countries

Doing History from the Bottom Up Staughton Lynd, 2014-12-01 Reflections on the crucial importance of including the perspectives of the marginalized and the non elite in our historical accounts In the 1960s historians on both sides of the Atlantic began to challenge the assumptions of their colleagues and push for an understanding of history from below In this collection of writings Staughton Lynd one of the pioneers of this approach laments the passing of fellow luminaries David Montgomery E P Thompson Alfred Young and Howard Zinn offers an account of the decline of trade unionism based on the narratives of workers and his efforts as a lawyer to assist them and makes the case that contemporary academics and activists alike should take more seriously the stories and perspectives of Native Americans slaves rank and file workers and other still too frequently marginalized voices

The Routledge International Handbook of the Crimes of the Powerful Gregg Barak,2015-06-05 Across the world most people are well aware of ordinary criminal harms to person and property Often committed by the powerless and poor these individualized crimes are catalogued in the statistics collected annually by the FBI and by similar agencies in other developed nations In contrast the more harmful and systemic forms of injury to person and property committed by powerful and wealthy individuals groups and national states are neither calculated by governmental agencies nor annually reported by the mass media As a result most citizens of the world are unaware of the routinized crimes of the powerful even though they are more likely to experience harms and injuries from these types of organized offenses than they are from the atomized offenses of the powerless Research on the crimes of the powerful brings together several areas of criminological focus involving organizational and institutional networks of powerful people that commit crimes against workers marketplaces taxpayers and political systems as well as acts of torture terrorism and genocide This international handbook offers a comprehensive authoritative and structural synthesis of these interrelated topics of criminological concern It also explains why the crimes of the powerful are so difficult to control Edited by internationally acclaimed criminologist Gregg Barak this book reflects the state of the art of scholarly research covering all the key areas including corporate global

environmental and state crimes The handbook is a perfect resource for students and researchers engaged with explaining and controlling the crimes of the powerful domestically and internationally

Clean Disruption of Energy and Transportation Tony Seba, 2014-06-27 The industrial age of energy and transportation will be over by 2030 Maybe before Exponentially improving technologies such as solar electric vehicles and autonomous self driving cars will disrupt and sweep away the energy and transportation industries as we know it The same Silicon Valley ecosystem that created bit based technologies that have disrupted atom based industries is now creating bit and electron based technologies that will disrupt atom based energy industries Clean Disruption projections based on technology cost curves business model innovation as well as product innovation show that by 2030 All new energy will be provided by solar or wind All new mass market vehicles will be electric All of these vehicles will be autonomous self driving or semi autonomous The new car market will shrink by 80% Even assuming that EVs don't kill the gasoline car by 2030 the self driving car will shrink the new car market by 80% Gasoline will be obsolete Nuclear is already obsolete Up to 80% of highways will be redundant Up to 80% of parking spaces will be redundant The concept of individual car ownership will be obsolete The Car Insurance industry will be disrupted The Stone Age did not end because we ran out of rocks It ended because a disruptive technology ushered in the Bronze Age The era of centralized command and control extraction resource based energy sources oil gas coal and nuclear will not end because we run out of petroleum natural gas coal or uranium It will end because these energy sources the business models they employ and the products that sustain them will be disrupted by superior technologies product architectures and business models This is a technology based disruption reminiscent of how the cell phone Internet and personal computer swept away industries such as landline telephony publishing and mainframe computers Just like those technology disruptions flipped the architecture of information and brought abundant cheap and participatory information the clean disruption will flip the architecture of energy and bring abundant cheap and participatory energy Just like those previous technology disruptions the Clean Disruption is inevitable and it will be swift

Walmart in the Global South Carolina Bank Muñoz, Bridget Kenny, Antonio Stecher, 2018-05-02 As the largest private employer in the world Walmart dominates media and academic

debate about the global expansion of transnational retail corporations and the working conditions in retail operations and across the supply chain Yet far from being a monolithic force conquering the world Walmart must confront and adapt to diverse policies and practices pertaining to regulation economy history union organization preexisting labor cultures and civil society in every country into which it enters This transnational aspect of the Walmart story including the diversity and flexibility of its strategies and practices outside the United States is mostly unreported Walmart in the Global South presents empirical case studies of Walmart's labor practices and supply chain operations in a number of countries including Chile Brazil Argentina Nicaragua Mexico South Africa and Thailand It assesses the similarities and differences in Walmart's acceptance into varying national contexts which reveals when and how state regulation and politics have served to redirect company practice and to what effect Regulatory context state politics trade unions local cultures and global labor solidarity emerge as vectors with very different force around the world The volume's contributors show how and why foreign workers have successfully though not uniformly driven changes in Walmart's corporate culture This makes Walmart in the Global South a practical guide for organizations that promote social justice and engage in worker struggles including unions worker centers and other nonprofit entities

Technically Together Taylor Dotson, 2024-02-06 Why we should not accept networked individualism as the inevitable future of community If social interaction by social media has become the modern front porch as one sociologist argues offering richer and more various contexts for community and personal connection why do we often feel lonelier after checking Facebook For one thing as Taylor Dotson writes in Technically Together Try getting a Facebook status update to help move a couch or stay for dinner Dotson argues that the experts who assure us that networked individualism will only bring us closer together seem to be urging citizens to adapt their social expectations to the current limits of technology and discouraging them from considering how technologies could be refashioned to enable other ways of relating and belonging Dotson characterizes different instantiations of community as thick or thin depending on the facets and manifestations of togetherness that they encompass Individuating social networks are a form of community he explains but relatively thin in regard to several dimensions of communality Dotson points out that current technological practices are not foreordained but supported by policies economic arrangements and entrenched patterns of thought He examines a range of systems organizations and infrastructures from suburban sprawl and smartphones to energy grids and cry it out sleep training for infants and considers whether they contribute to the atomization of social life or to togetherness and community vibrancy Dotson argues that technology could support multifaceted communities if citizens stopped accepting the technological status quo and instead demanded more from their ever present devices

Human, All Too (Post)Human Jennifer Cotter, Kimberly DeFazio, Robert Faivre, Amrohini Sahay, Julie P. Torrant, Stephen Tumino, Robert Wilkie, 2016-06-02 The contemporary has marked itself off from modernity by questioning its humanism that centers the world around the human as the moral subject of free will and self determination the bearer of universal essence that is the basis of human

rights Modernism normalizes humanism through language as referential a set of interrelated signs that correspond to the empirical reality outside it Humanist modernity in other words is seen in the contemporary as a regime that by separating the human from the non human and insisting on language as correspondence not only fails to engage the emerging forms of social relations in which the boundaries of human and machine are fading but is also indifferent to the difference between the other s life and other lives Human All Too Post Human The Humanities after Humanism argues that the Nietzschean tendencies that provide the philosophical boundaries of post humanism do not undo humanism but reform it constructing a parallel discourse that saves humanism from itself Grounded in materialist analysis of social life Human All Too Post Human argues that humanism and post humanism are cultural discourses that normalize different stages of capitalism analog and digital capitalism They are different orders of property relations The question the writers argue is not humanism or post humanism namely cultural representations but the material relations of production that are centered on wage labor Language free will or human rights are not the issues since Right can never be higher than the economic structure of society and its cultural development conditioned thereby The question that shapes all questions in Human All Too Post Human is freedom from wage labor
