Kierner, 2019-09-06 When hurricanes earthquakes wildfires and other disasters strike we count our losses search for causes commiserate with victims and initiate relief efforts Amply illustrated and expansively researched **Inventing Disaster** explains the origins and development of this predictable even ritualized culture of calamity over three centuries exploring its roots in the revolutions in science information and emotion that were part of the Age of Enlightenment in Europe and America Beginning with the collapse of the early seventeenth century Jamestown colony ending with the deadly Johnstown flood of 1889 and highlighting fires epidemics earthquakes and exploding steamboats along the way Cynthia A Kierner tells horrific stories of culturally significant calamities and their victims and charts efforts to explain prevent and relieve disaster related losses Although how we interpret and respond to disasters has changed in some ways since the nineteenth century Kierner demonstrates that for better or worse the intellectual economic and political environments of earlier eras forged our own twenty first century approach to disaster shaping the stories we tell the precautions we ponder and the remedies we prescribe for disaster ravaged communities
