FCC Record United States. Federal Communications Commission, 1996 State Building in Boom Times Ryan Saylor, 2014 *State Building in Boom Times* argues that commodity booms and coalitional politics are central to understanding the state building variation within and across Latin America and Africa It shows how resource booms can trigger the provision of new public goods and institutional strengthening and thus help countries expand their state capacity But these possibilities hinge on coalitional politics as seen through six cases Countries ruled by export oriented coalitions Argentina Chile and Mauritius expanded their state capacity as a direct result of commodity booms But countries in which exporters were politically marginalized Colombia Ghana and Nigeria missed analogous state building opportunities because ruling coalitions preyed upon export wealth rather than promoting export interests via state building The coalitional basis of these divergent outcomes suggests that contrary to the prevailing belief in a resource curse natural resource wealth does not necessarily dispose countries to low state capacity Instead export oriented coalitions can harness boom times for developmental gains even in the context of weak institutions This finding warrants reappraising some widespread presumptions about the relationship between resource wealth and state building as well as the public policies that are commonly proposed for developing countries to manage their natural resource wealth **Title List of Documents Made Publicly Available**

The Pennsylvania Railroad Albert J. Churella, 2023-11-21 By 1933 the Pennsylvania Railroad had been in existence for nearly ninety years During this time it had grown from a small line struggling to build west from the state capital in Harrisburg to the dominant transportation company in the United States In Volume 2 of *The Pennsylvania Railroad* Albert J Churella continues his history of this giant of American transportation At the beginning of the twentieth century the Pennsylvania Railroad was the world's largest business corporation and the nation's most important railroad By 1917 the Pennsylvania Railroad like the nation itself was confronting a very different world The war that had consumed Europe since 1914 was about to engulf the United States Amid unprecedented demand for transportation the federal government undertook the management of the railroads while new labor policies and new regulatory initiatives coupled with a postwar

recession would challenge the company like never before Only time would tell whether the years that followed would signal a new beginning for the Pennsylvania Railroad or the beginning of the end The Pennsylvania Railroad The Age of Limits 1917 1933 represents an unparalleled look at the history the personalities and the technologies of this iconic American company in a period that marked the shift from building an empire to exploring the limits of their power **West's Federal Practice Digest** ,2003 Water and Water Engineering ,1928 Federal Energy Regulatory Commission Reports United States. Federal Energy Regulatory Commission,2004-04 Jesus Wept: The Significance of Jesus' Laments in the New Testament Rebekah Eklund,2015-02-26 Lament does not seem to be a pervasive feature of the New Testament particularly when viewed in relation to the Old Testament A careful investigation of the New Testament however reveals that it thoroughly incorporates the pattern of Old Testament lament into its proclamation of the gospel especially in the person of Jesus Christ as he both prays and embodies lament As an act that fundamentally calls upon God to be faithful to God s promises to Israel and to the church lament in the New Testament becomes a prayer of longing for God s kingdom which has been inaugurated in the ministry and resurrection of Jesus fully to come *Federal Register* ,2013-04 *Congressional Record* United States. Congress,1996 **Mantikê** Sarah Iles Johnston,Peter T. Bjorklund, 2016-09-30 Several themes emerge in this 2014 2015 edition of the Yearbook. The first is a notable focus on country and region specific developments. Different articles focus on key developments in such countries as Australia, Brazil, China, Ghana, India, Indonesia, Russia, and South Africa. Others focus on regional innovations, in particular in Latin America. A second area of attention is reform and proposals for reform in investor state dispute settlement and in investment law generally. The third theme is the continued concern about states' regulatory autonomy and the importance of their retaining ability to protect the interests of their nationals. A fourth theme concerns the continued contribution that investment arbitration makes to the development of international law and the influence that it is starting to have on other areas of law, whether that is as a source of inspiration in the interpretation of other norms or as a source of potentially powerful persuasive authority given the teeth that investment law has with respect to enforcement. Included are the winning memorials of the FDI Moot for both 2014 and 2015. In 2014 a team from the University of Ottawa submitted the winning claimant's memorial while students from Harvard Law School submitted the winning respondent's memorial. In 2015 Harvard repeated its stellar performance again winning best respondent's memorial. The winning claimant's memorial in 2015 was submitted by students from the National and Kapodistrian University of Athens. These excellent memorials reveal once again the growing interest of students in international investment law and demonstrate a striving for excellence and an enthusiasm for grappling with intellectually challenging issues.

Viability in Corporate Debt Restructuring Law

Lydia Tsioli, 2025-09-10 This book offers the first holistic and comprehensive analysis of corporate debt restructuring law through the lens of viability. The notion is of pivotal importance because it determines which debtors are worth being rescued. By examining US, UK, and EU restructuring frameworks, the book uncovers, critically evaluates, and makes proposals for the optimal reflection of viability on their provisions. These proposals provide invaluable guidance for both the upcoming review of the European Directive on restructuring and insolvency in 2026 and the ongoing development of American and English restructuring law.
